

<b>AV Mathematics-III for EC Engineering</b>		Semester	3
Course Code	<b>BMATEC301</b>	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	03
Examination type (SEE)	Theory		

**Course objectives:**

- Learn to use the Fourier series to represent periodical physical phenomena in engineering analysis and to enable the student to express non-periodic functions to periodic functions using the Fourier series and Fourier transforms.
- Analyze signals in terms of Fourier transforms
- Develop the knowledge of solving differential equations and their applications in Electronics & Communication engineering.
- To find the association between attributes and the correlation between two variables

**Teaching-Learning Process**

**Pedagogy (General Instructions):**

These are sample Strategies, teachers can use to accelerate the attainment of the various course outcomes.

1. In addition to the traditional lecture method, different types of innovative teaching methods may be adopted so that the delivered lessons shall develop students' theoretical and applied Mathematical skills.
2. State the need for Mathematics with Engineering Studies and Provide real-life examples.
3. Support and guide the students for self-study.
4. You will assign homework, grading assignments and quizzes, and documenting students' progress.
5. Encourage the students to group learning to improve their creative and analytical skills.
6. Show short related video lectures in the following ways:
  - As an introduction to new topics (pre-lecture activity).
  - As a revision of topics (post-lecture activity).
  - As additional examples (post-lecture activity).
  - As an additional material of challenging topics (pre-and post-lecture activity).
  - As a model solution of some exercises (post-lecture activity).

**Module-1: Fourier series and practical harmonic analysis**

Periodic functions, Dirichlet's condition. Fourier series expansion of functions with period  $2\pi$  and with arbitrary period: periodic rectangular wave, Half-wave rectifier, rectangular pulse, Saw tooth wave. Half-range Fourier series. Triangle and half range expansions, Practical harmonic analysis, variation of periodic current. **(8 hours)**

**(RBT Levels: L1, L2 and L3)**

**Module-2: Infinite Fourier Transforms**

Infinite Fourier transforms, Fourier cosine and sine transforms, Inverse Fourier transforms, Inverse Fourier cosine and sine transforms, discrete Fourier transform (DFT), Fast Fourier transform (FFT). **(8 hours)**

**(RBT Levels: L1, L2 and L3)**

**Module-3: Z Transforms**

Definition, Z-transforms of basic sequences and standard functions. Properties: Linearity, scaling, first and second shifting, multiplication by n. Initial and final value theorem. Inverse Z-transforms. Application to difference equations. **(8 hours)**

**(RBT Levels: L1, L2 and L3)**

### **Module-4: Ordinary Differential Equations of Higher Order**

Higher-order linear ODEs with constant coefficients - Inverse differential operator, problems. Linear differential equations with variable Coefficients-Cauchy's and Legendre's differential equations-Problems. Application of linear differential equations to L-C circuit and L-C-R circuit. **(8 hours)**

**(RBT Levels: L1, L2 and L3)**

### **Module-5: Curve fitting, Correlation, and Regressions**

Principles of least squares, Curve fitting by the method of least squares in the form  $y = a + bx$ ,  $y = a + bx + cx^2$ , and  $y = ax^b$ . Correlation, Coefficient of correlation, Lines of regression, Angle between regression lines, standard error of estimate, rank correlation.

**(RBT Levels: L1, L2 and L3)(8 hours)**

### **Course outcome (Course Skill Set)**

At the end of the course, the student will be able to:

1. Demonstrate the Fourier series to study the behavior of periodic functions and their applications in system communications, digital signal processing, and field theory.
2. To use Fourier transforms to analyze problems involving continuous-time signals
3. To apply Z-Transform techniques to solve difference equations
4. Understand that physical systems can be described by differential equations and solve such equations
5. Make use of correlation and regression analysis to fit a suitable mathematical model for statistical data

### **Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). The student is declared as a pass in the course if he/she secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

### **Continuous Internal Evaluation:**

- There are 25 marks for the CIE's Assignment component and 25 for the Internal Assessment Test component.
- Each test shall be conducted for 25 marks. The first test will be administered after 40-50% of the coverage of the syllabus, and the second test will be administered after 85-90% of the coverage of the syllabus. The average of the two tests shall be scaled down to 25 marks
- Any two assignment methods mentioned in the 22OB2.4, if an assignment is project-based then only one assignment for the course shall be planned. The schedule for assignments shall be planned properly by the course teacher. The teacher should not conduct two assignments at the end of the semester if two assignments are planned. Each assignment shall be conducted for 25 marks. (If two assignments are conducted then the sum of the two assignments shall be scaled down to 25 marks)
- The final CIE marks of the course out of 50 will be the sum of the scale-down marks of tests and assignment/s marks.

**Internal Assessment Test question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

**Semester-End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**).

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.
4. Marks scored shall be proportionally reduced to 50 marks

**Suggested Learning Resources:**

**Books (Name of the author/Title of the Book/Name of the publisher/Edition and Year)**

**Text Books:**

1. **B. S. Grewal:** "Higher Engineering Mathematics", Khanna Publishers, 44<sup>th</sup>Ed., 2021.
2. **E. Kreyszig:** "Advanced Engineering Mathematics", John Wiley & Sons, 10<sup>th</sup>Ed., 2018.

**Reference Books:**

1. **V. Ramana:** "Higher Engineering Mathematics" McGraw-Hill Education, 11<sup>th</sup>Ed., 2017
2. **Srimanta Pal & Subodh C.Bhunia:** "Engineering Mathematics" Oxford University Press, 3<sup>rd</sup>Ed., 2016.
3. **N.P Bali and Manish Goyal:** "A Textbook of Engineering Mathematics" Laxmi Publications, 10<sup>th</sup>Ed., 2022.
4. **C. Ray Wylie, Louis C. Barrett:** "Advanced Engineering Mathematics" McGraw-Hill Book Co., New York, 6<sup>th</sup>Ed., 2017.
5. **Gupta C.B, Sing S.R and Mukesh Kumar:** "Engineering Mathematic for Semester I and II", McGraw Hill Education(India) Pvt. Ltd 2015.
6. **H.K. Dass and Er. Rajnish Verma:** "Higher Engineering Mathematics" S.Chand Publication, 3<sup>rd</sup>Ed.,2014.
7. **James Stewart:** "Calculus" Cengage Publications, 7<sup>th</sup>Ed., 2019.

<b>Digital System Design using Verilog</b>		Semester	3
Course Code	<b>BEC302</b>	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:2	SEE Marks	50
Total Hours of Pedagogy	40 hours Theory + 8-10 Lab slots	Total Marks	100
Credits	04	Exam Hours	03
Examination nature (SEE)	Theory/Practical		
<p><b>Course objectives:</b>  This course will enable students to:</p> <ul style="list-style-type: none"> <li>• To impart the concepts of simplifying Boolean expression using K-map techniques and Quine-McCluskey minimization techniques.</li> <li>• To impart the concepts of designing and analyzing combinational logic circuits.</li> <li>• To impart design methods and analysis of sequential logic circuits.</li> <li>• To impart the concepts of Verilog HDL-data flow and behavioural models for the design of digital systems.</li> </ul>			
<p><b>Teaching-Learning Process (General Instructions)</b>  These are sample Strategies, which teacher can use to accelerate the attainment of the various course outcomes.</p> <ul style="list-style-type: none"> <li>• Lecture method (L) does not mean only traditional lecture method, but different type of teaching methods may be adopted to develop the outcomes.</li> <li>• Show Video/animation films to explain the different concepts of Linear Algebra &amp; Signal Processing.</li> <li>• Encourage collaborative (Group) Learning in the class.</li> <li>• Ask at least three HOTS (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>• Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop thinking skills such as the ability to evaluate, generalize, and analyze information rather than simply recall it.</li> <li>• Topics will be introduced in a multiple representation.</li> <li>• Show the different ways to solve the same problem and encourage the students to come up with their own creative ways to solve them.</li> <li>• Discuss how every concept can be applied to the real world-and when that's possible, it helps improve the students' understanding.</li> <li>• Adopt Flipped class technique by sharing the materials/Sample Videos prior to the class and have discussions on the topic in the succeeding classes.</li> <li>• Give Programming Assignments.</li> </ul>			
<b>MODULE-1</b>			
<p><b>Principles of Combinational Logic:</b> Definition of combinational logic, Canonical forms, Generation of switching equations from truth tables, Karnaugh maps-up to 4 variables, Quine-McCluskey Minimization Technique. Quine-McCluskey using Don't Care Terms.(Section3.1to3.5ofText1).</p>			
<b>MODULE-2</b>			
<p><b>Logic Design with MSI Components and Programmable Logic Devices:</b> Binary Adders and Subtractors, Comparators, Decoders, Encoders, Multiplexers, Programmable Logic Devices(PLDs) (Section5.1to5.7 ofText2)</p>			
<b>MODULE-3</b>			

**Flip-Flops and its Applications:** The Master-Slave Flip-flops(Pulse-Triggered flip-flops):SR flip-flops, JK flip flops, Characteristic equations, Registers, Binary Ripple Counters, Synchronous Binary Counters, Counters based on Shift Registers, Design of Synchronous mod-n Counter using clocked T, J K, D and SR flip-flops.(Section 6.4, 6.6 to 6.9 (Excluding 6.9.3)of Text2)

#### MODULE-4

**Introduction to Verilog:** Structure of Verilog module, Operators, Data Types, Styles of Description. (Section1.1to1.6.2, 1.6.4 (only Verilog),2 of Text 3)

**Verilog Data flow description:** Highlights of Data flow description, Structure of Data flow description.(Section2.1to2.2(only Verilog) of Text3)

#### MODULE-5

**Verilog Behavioral description:** Structure, Variable Assignment Statement, Sequential Statements, Loop Statements, Verilog Behavioral Description of Multiplexers (2:1, 4:1, 8:1). (Section 3.1 to 3.4 (onlyVerilog)of Text 3)

**Verilog Structural description:** Highlights of Structural description, Organization of structural description, Structural description of ripple carry adder.(Section4.1 to 4.2 of Text 3)

**PRACTICAL COMPONENT OF IPCC** (*Experiments can be conducted either using any circuit simulation software or discrete components*)

SLN	Experiments
1	To simplify the given Boolean expressions and realize using Verilog program
2	To realize Adder/Subtractor(Full/half)circuits using Verilog data flow description.
3	To realize 4-bit ALU using Verilog program.
4	To realize the following Code converters using Verilog Behavioral description a)Gray to binary and vice versa b)Binary to excess3 and vice versa
5	To realize using Verilog Behavioral description:8:1mux, 8:3encoder, Priority encoder
6	To realize using Verilog Behavioral description:1:8Demux, 3:8 decoder,2 –bit Comparator
7	To realize using Verilog Behavioral description: Flip-flops: a)JK type b)SR type c)T type and d)D type
8	To realize Counters-up/down (BCD and binary)using Verilog Behavioral description.
<b>Demonstration Experiments (For CIE only–not to be included for SEE)</b> Use FPGA/CPLD kits for down loading Verilog codes and check the output for interfacing experiments.	
9	Verilog Program to interface a Stepper motor to the FPGA/CPLD and rotate the motor in the specified direction (by N steps).
10	Verilog programs to interface Switches and LEDs to the FPGA/CPLD and demonstrate its working.
<b>Course outcomes (Course Skill Set):</b> At the end of the course the student will be able to:	
1. Simplify Boolean functions using K-map and Quine-McCluskey minimization technique.	
2. Analyze and design for combinational logic circuits.	
3. Analyze the concepts of Flip Flops(SR, D,T and JK) and to design the synchronous sequential circuits using Flip Flops.	
4. Model Combinational circuits (adders, subtractors, multiplexers) and sequential circuits using Verilog descriptions.	

### **Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). The student is declared as a pass in the course if he/she secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

The IPCC means the practical portion integrated with the theory of the course. CIE marks for the theory component are **25 marks** and that for the practical component is **25 marks**.

#### **CIE for the theory component of the IPCC**

- 25 marks for the theory component are split into **15 marks** for two Internal Assessment Tests (Two Tests, each of 15 Marks with 01-hour duration, are to be conducted) and **10 marks** for other assessment methods mentioned in 22OB4.2. The first test at the end of 40-50% coverage of the syllabus and the second test after covering 85-90% of the syllabus.
- Scaled-down marks of the sum of two tests and other assessment methods will be CIE marks for the theory component of IPCC (that is for **25 marks**).
- The student has to secure 40% of 25 marks to qualify in the CIE of the theory component of IPCC.

#### **CIE for the practical component of the IPCC**

- **15 marks** for the conduction of the experiment and preparation of laboratory record, and **10 marks** for the test to be conducted after the completion of all the laboratory sessions.
- On completion of every experiment/program in the laboratory, the students shall be evaluated including viva-voce and marks shall be awarded on the same day.
- The CIE marks awarded in the case of the Practical component shall be based on the continuous evaluation of the laboratory report. Each experiment report can be evaluated for 10 marks. Marks of all experiments' write-ups are added and scaled down to **15 marks**.
- The laboratory test (**duration 02/03 hours**) after completion of all the experiments shall be conducted for 50 marks and scaled down to **10 marks**.
- Scaled-down marks of write-up evaluations and tests added will be CIE marks for the laboratory component of IPCC for **25 marks**.
- The student has to secure 40% of 25 marks to qualify in the CIE of the practical component of the IPCC.

#### **SEE for IPCC**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.
4. Marks scored by the student shall be proportionally scaled down to 50 Marks

**The theory portion of the IPCC shall be for both CIE and SEE, whereas the practical portion will have a CIE component only. Questions mentioned in the SEE paper may include questions from the practical component.**

- The minimum marks to be secured in CIE to appear for SEE shall be 10 (40% of maximum marks-25) in the theory component and 10 (40% of maximum marks -25) in the practical component. The laboratory component of the IPCC shall be for CIE only. However, in SEE, the questions from the laboratory component shall be included. The maximum of 04/05 sub-questions are to be set from the practical component of IPCC, the total marks of all questions

should not be more than 20 marks.

- SEE will be conducted for 100 marks and students shall secure 35% of the maximum marks to qualify for the SEE. Marks secured will be scaled down to 50.
- The student is declared as a pass in the course if he/she secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

**Suggested Learning Resources:**

**Books**

1. Digital Logic Applications and Design by John MYarbrough, Thomson Learning, 2001.
2. Digital Principles and Design by Donald DGivone, McGrawHill, 2002.
3. HDL Programming VHDL and Verilog by Nazeih M Botros, 2009 reprint, Dream techpress.

**ReferenceBooks:**

1. Fundamentals of logic design, by Charles H Roth Jr., Cengage Learning
2. Logic Design, by Sudhakar Samuel, Pearson/Sanguine, 2007
3. Fundamentals of HDL, by Cyril PR, Pearson/Sanguine 2010

<p><b>MOSFET</b> Biasing in MOS amplifier circuits: Fixing VGS, Fixing VG, Drain to Gate feedback resistor. Small signal operation and modelling: The DC bias point, signal current in drain, voltage gain, small signal equivalent circuit models, transconductance, The T equivalent circuit model. MOSFET Amplifier configuration: Basic configurations, characterizing amplifiers, CS amplifier with and without source resistance, The Common Gate Amplifier, Source follower.</p> <p>[Text 2]</p>			

### MODULE-3

**Linear Opamp Circuits:** Summing Amplifier and D/A Converter, Nonlinear Op-amp Circuits: Comparator with zero reference, Comparator with non-zero references. Comparator with Hysteresis.

**Oscillator:** Theory of Sinusoidal Oscillation, The Wein-Bridge Oscillator, RC Phase Shift Oscillator, The Colpitts Oscillator, Hartley Oscillator, Crystal Oscillator.

**The 555 timer:** Monostable Operation, Astable Operation.

[Text1]

### MODULE-4

**Negative Feedback:** Four Types of Negative Feedback, VCVS Voltage gain, Other VCVS Equations, ICVS Amplifier, VCIS Amplifier, ICIS Amplifier (No Mathematical Derivation).

**Active Filters:** Ideal Responses, First Order Stages, VCVS Unity Gain Second Order Low pass Filters, VCVS Equal Component Low Pass Filters, VCVS High Pass Filters, MFB Bandpass Filters, Bandstop Filters.

[Text1]

### MODULE-5

**Power Amplifiers:** Amplifier terms, Two load lines, Class A Operation, Class B operation, Class B push pull emitter follower, Class C Operation.

**Thyristors:** The four layer Diode, SCR, SCR Phase control, Bidirectional Thyristors, IGBTs, Other Thyristors.

[Text1]

**PRACTICAL COMPONENT OF IPCC** (*Experiments can be conducted either using any circuit simulation software or discrete components*)

Sl.NO	Experiments
1	Design and Test (i) Bridge Rectifier with Capacitor Input Filter (ii) Zener voltage regulator
2	Design and Test Biased Clippers – a) Positive, b) Negative, c) Positive-Negative Positive and Negative Clampers with and without Reference.
3	Plot the transfer and drain characteristics of a JFET and calculate its drain resistance, mutual conductance and amplification factor.
4	Plot the transfer and drain characteristics of n-channel MOSFET and calculate its parameters, namely; drain resistance, mutual conductance and amplification factor.
5	Design and test Emitter Follower
6	Design and plot the frequency response of Common Source JFET/MOSFET amplifier
7	Test the Opamp Comparator with zero and non zero reference and obtain the Hysteresis curve.
8	Design and test Full wave Controlled rectifier using RC triggering circuit.
9	Design and test Precision Half wave and full wave rectifiers using Opamp
10	Design and test RC phase shift oscillator

**Course outcomes (Course Skill Set):**

At the end of the course, the student will be able to:

1. Understand the characteristics of BJTs and FETs for switching and amplifier circuits.
2. Design and analyze amplifiers and oscillators with different circuit configurations and biasing conditions.
3. Understand the feedback topologies and approximations in the design of amplifiers and oscillators.
4. Design of circuits using linear ICs for wide range applications such as ADC, DAC, filters and timers.
5. Understand the power electronic device components and its functions for basic power electronic circuits.

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). The student is declared as a pass in the course if he/she secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

The IPCC means the practical portion integrated with the theory of the course. CIE marks for the theory component are **25 marks** and that for the practical component is **25 marks**.

**CIE for the theory component of the IPCC**

- 25 marks for the theory component are split into **15 marks** for two Internal Assessment Tests (Two Tests, each of 15 Marks with 01-hour duration, are to be conducted) and **10 marks** for other assessment methods mentioned in 22OB4.2. The first test at the end of 40-50% coverage of the syllabus and the second test after covering 85-90% of the syllabus.

- Scaled-down marks of the sum of two tests and other assessment methods will be CIE marks for the theory component of IPCC (that is for **25 marks**).
- The student has to secure 40% of 25 marks to qualify in the CIE of the theory component of IPCC.

#### **CIE for the practical component of the IPCC**

- **15 marks** for the conduction of the experiment and preparation of laboratory record, and **10 marks** for the test to be conducted after the completion of all the laboratory sessions.
- On completion of every experiment/program in the laboratory, the students shall be evaluated including viva-voce and marks shall be awarded on the same day.
- The CIE marks awarded in the case of the Practical component shall be based on the continuous evaluation of the laboratory report. Each experiment report can be evaluated for 10 marks. Marks of all experiments' write-ups are added and scaled down to **15 marks**.
- The laboratory test (**duration 02/03 hours**) after completion of all the experiments shall be conducted for 50 marks and scaled down to **10 marks**.
- Scaled-down marks of write-up evaluations and tests added will be CIE marks for the laboratory component of IPCC for **25 marks**.
- The student has to secure 40% of 25 marks to qualify in the CIE of the practical component of the IPCC.

#### **SEE for IPCC**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.
4. Marks scored by the student shall be proportionally scaled down to 50 Marks

**The theory portion of the IPCC shall be for both CIE and SEE, whereas the practical portion will have a CIE component only. Questions mentioned in the SEE paper may include questions from the practical component.**

- The minimum marks to be secured in CIE to appear for SEE shall be 10 (40% of maximum marks-25) in the theory component and 10 (40% of maximum marks -25) in the practical component. The laboratory component of the IPCC shall be for CIE only. However, in SEE, the questions from the laboratory component shall be included. The maximum of 04/05 sub-questions are to be set from the practical component of IPCC, the total marks of all questions should not be more than 20 marks.
- SEE will be conducted for 100 marks and students shall secure 35% of the maximum marks to qualify for the SEE. Marks secured will be scaled down to 50.
- The student is declared as a pass in the course if he/she secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

<b>Module-1</b>			
<b>Basic Concepts:</b> Practical sources, Source transformations, Network reduction using Star - Delta transformation, Loop and node analysis with linearly dependent and independent sources for DC and AC networks.			
<b>Module-2</b>			
<b>Network Theorems:</b> Superposition, Millman's theorems, Thevenin's and Norton's theorems, Maximum Power transfer theorem.			
<b>Module-3</b>			
<b>Transient behavior and initial conditions:</b> Behavior of circuit elements under switching condition and their Representation, evaluation of initial and final conditions in RL, RC and			

RLC circuits for AC and DC excitations.

#### Module-4

**Laplace Transformation & Applications:** Solution of networks, step, ramp and impulse responses, waveform Synthesis.

#### Module-5

**Two port network parameters:** Definition of Z, Y, h and Transmission parameters, modelling with these parameters, relationship between parameters sets.

**Resonance:**

**Series Resonance:** Variation of Current and Voltage with Frequency, Selectivity and Bandwidth, Q-Factor, Circuit Magnification Factor, Selectivity with Variable Capacitance, Selectivity with Variable Inductance.

**Parallel Resonance:** Selectivity and Bandwidth, Maximum Impedance Conditions with C, L and f Variable, current in Anti-Resonant Circuit, The General Case-Resistance Present in both Branches.

#### Course outcome (Course Skill Set)

At the end of the course, the student will be able to :

1. Determine currents and voltages using source transformation/ source shifting/ mesh/ nodal analysis and reduce given network using star- delta transformation.
2. Solve problems by applying Network Theorems and electrical laws to reduce circuit complexities and to arrive at feasible solutions.
3. Analyse the circuit parameters during switching transients and apply Laplace transform to solve the given network
4. Evaluate the frequency response for resonant circuits and the network parameters for two port networks

### **Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). The student is declared as a pass in the course if he/she secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

### **Continuous Internal Evaluation:**

- There are 25 marks for the CIE's Assignment component and 25 for the Internal Assessment Test component.
- Each test shall be conducted for 25 marks. The first test will be administered after 40-50% of the coverage of the syllabus, and the second test will be administered after 85-90% of the coverage of the syllabus. The average of the two tests shall be scaled down to 25 marks
- Any two assignment methods mentioned in the 22OB2.4, if an assignment is project-based then only one assignment for the course shall be planned. The schedule for assignments shall be planned properly by the course teacher. The teacher should not conduct two assignments at the end of the semester if two assignments are planned. Each assignment shall be conducted for 25 marks. (If two assignments are conducted then the sum of the two assignments shall be scaled down to 25 marks)
- The final CIE marks of the course out of 50 will be the sum of the scale-down marks of tests and assignment/s marks.

**Internal Assessment Test question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

### **Semester-End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**).

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. ~~The students have to answer 5 full questions, selecting one full question from each module~~

<b>Analog and Digital Systems Design Laboratory</b>		Semester	<b>3</b>
Course Code	<b>BECL305</b>	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	0:0:2	SEE Marks	50
Credits	01	Exam Hours	100
Examination type (SEE)	Theory/Practical/Viva-Voce /Term-work/Others		
<b>Course objectives:</b>			
This laboratory course enables students to			
<ul style="list-style-type: none"> <li>• Understand the electronic circuit schematic and its working</li> <li>• Realize and test amplifier and oscillator circuits for the given specifications</li> <li>• Realize the opamp circuits for the applications such as DAC, implement mathematical functions and precision rectifiers.</li> <li>• Study the static characteristics of SCR and test the RC triggering circuit.</li> <li>• Design and test the combinational and sequential logic circuits for their functionalities.</li> <li>• Use the suitable ICs based on the specifications and functions.</li> </ul>			
<b>Sl.NO</b>	<b>Experiments (All the experiments has to be conducted using discrete components)</b>		
1	Design and set up the BJT common emitter voltage amplifier with and without feedback and determine the gain- bandwidth product, input and output impedances.		
2	Design and set-up BJT/FET i) Colpitts Oscillator, ii) Crystal Oscillator		
3	Design and set up the circuits using opamp: i) Adder, ii) Integrator, iii) Differentiator and iv) Comparator		
4	Design 4-bit R – 2R Op-Amp Digital to Analog Converter (i) for a 4-bit binary input using toggle switches (ii) by generating digital inputs using mod-16		
5	Design and implement (a) Half Adder & Full Adder using basic gates and NAND gates, (b) Half subtractor & Full subtractor using NAND gates, (c) 4-variable function using IC74151(8:1MUX).		
6	Realize (i) Binary to Gray code conversion & vice-versa (IC74139), (ii) BCD to Excess-3 code conversion and vice versa		
7	a) Realize using NAND Gates: i) Master-Slave JK Flip-Flop, ii) D Flip-Flop and iii) T Flip-Flop b) Realize the shift registers using IC7474/7495: (i) SISO (ii) SIPO (iii) PISO (iv) PIPO (v) Ring counter and (vi) Johnson counter.		
8	Realize a) Design Mod – N Synchronous Up Counter & Down Counter using 7476 JK Flip-flop b) Mod-N Counter using IC7490 / 7476 c) Synchronous counter using IC74192		
<b>Demonstration Experiments ( For CIE )</b>			
9	Design and Test the second order Active Filters and plot the frequency response, i) Low pass and Highpass Filter ii) Bandpass and Bandstop Filter		
10	Design and test the following using 555 timer i) Monostable Multivibrator ii) Astable Multivibrator		
11	Design and Test a Regulated Power supply		
12	Design and test an audio amplifier by connecting a microphone input and observe the output using a loud speaker.		

**Course outcomes (Course Skill Set):**

At the end of the course the student will be able to:

1. Design and analyze the BJT/FET amplifier and oscillator circuits.
2. Design and test Opamp circuits to realize the mathematical computations, DAC and precision rectifiers.
3. Design and test the combinational logic circuits for the given specifications.
4. Test the sequential logic circuits for the given functionality.
5. Demonstrate the basic circuit experiments using 555 timer.

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

**Continuous Internal Evaluation (CIE):**

CIE marks for the practical course are **50 Marks**.

The split-up of CIE marks for record/ journal and test are in the ratio **60:40**.

- Each experiment is to be evaluated for conduction with an observation sheet and record write-up. Rubrics for the evaluation of the journal/write-up for hardware/software experiments are designed by the faculty who is handling the laboratory session and are made known to students at the beginning of the practical session.
- Record should contain all the specified experiments in the syllabus and each experiment write-up will be evaluated for 10 marks.
- Total marks scored by the students are scaled down to **30 marks** (60% of maximum marks).
- Weightage to be given for neatness and submission of record/write-up on time.
- Department shall conduct a test of 100 marks after the completion of all the experiments listed in the syllabus.
- In a test, test write-up, conduction of experiment, acceptable result, and procedural knowledge will carry a weightage of 60% and the rest 40% for viva-voce.
- The suitable rubrics can be designed to evaluate each student's performance and learning ability.
- The marks scored shall be scaled down to **20 marks** (40% of the maximum marks).

The Sum of scaled-down marks scored in the report write-up/journal and marks of a test is the total CIE marks scored by the student.

**Semester End Evaluation (SEE):**

- SEE marks for the practical course are 50 Marks.
- **SEE shall be conducted jointly by the two examiners of the same institute, examiners are appointed by the Head of the Institute.**
- The examination schedule and names of examiners are informed to the university before the conduction of the examination. These practical examinations are to be conducted between the schedule mentioned in the academic calendar of the University.
- All laboratory experiments are to be included for practical examination.
- (Rubrics) Breakup of marks and the instructions printed on the cover page of the answer script to be strictly adhered to by the examiners. **OR** based on the course requirement evaluation rubrics shall be decided jointly by examiners.
- Students can pick one question (experiment) from the questions lot prepared by the examiners jointly.
- Evaluation of test write-up/ conduction procedure and result/viva will be conducted jointly by examiners.

General rubrics suggested for SEE are mentioned here, writeup-20%, Conduction procedure and result in -60%, Viva-voce 20% of maximum marks. SEE for practical shall be evaluated for 100 marks and scored marks shall

be scaled down to 50 marks (however, based on course type, rubrics shall be decided by the examiners)

Change of experiment is allowed only once and 15% of Marks allotted to the procedure part are to be made zero.

The minimum duration of SEE is 02 hours

<b>Module-1</b>			
<p><b>Semiconductors</b>  Bonding forces in solids, Energy bands, Metals, Semiconductors and Insulators, Direct and Indirect semiconductors, Electrons and Holes, Intrinsic and Extrinsic materials, Conductivity and Mobility, Drift and Resistance, Effects of temperature and doping on mobility, Hall Effect.  <b>(Text1:3.1.1,3.1.2,3.1.3,3.1.4,3.2.1,3.2.3,3.2.4,3.4.1,3.4.2,3.4.3,3.4.5).</b></p>			
<b>Module-2</b>			
<p><b>PN Junctions</b>  Forward and Reverse biased junctions-Qualitative description of Current flow at a junction, reverse bias, Reverse bias breakdown- Zener breakdown, avalanche breakdown, Rectifiers.<b>(Text1:5.3.1,5.3.3,5.4,5.4.1,5.4.2,5.4.3)</b>  Optoelectronic Devices Photodiodes: Current and Voltage in an Illuminated Junction, Solar Cells, Photodetectors. Light Emitting Diode: Light Emitting materials.  <b>(Text1:8.1.1,8.1.2,8.1.3,8.2,8.2.1),</b></p>			
<b>Module-3</b>			

**Bipolar Junction Transistor**

Fundamentals of BJT operation, Amplification with BJTS, BJT Fabrication, The coupled Diode model (Ebers-Moll Model), Switching operation of a transistor, Cutoff, saturation, switching cycle, specifications, Drift in the base region, Base narrowing, Avalanche breakdown.

(Text1:7.1,7.2,7.3,7.5.1,7.6,7.7.1,7.7.2, 7.7.3)

**Module-4****Field Effect Transistors**

Basic pn JFET Operation, Equivalent Circuit and Frequency Limitations, MOSFET-Two terminal MO Sstructure- Energy band diagram, Ideal Capacitance  
-Voltage Characteristics and Frequency Effects, Basic MOSFET Operation- MOSFET structure, Current-Voltage Characteristics.

(Text2:9.1.1,9.4,9.6.1,9.6.2,9.7.1,9.7.2,9.8.1,9.8.2).

**Module-5****Fabrication of p-n junctions**

Thermal Oxidation, Diffusion, Rapid Thermal Processing, Ion implantation, chemical vapour deposition, photolithography, Etching, metallization. (Text 1: 5.1)

**Integrated Circuits**

Background, Evolution of ICs, CMOS Process Integration, Integration of Other Circuit Elements.(Text 1:9.1,9.2,9.3.1,9.3.3).

**Course outcome (Course Skill Set)**

At the end of the course, the student will be able to :

1. Understand the principles of semiconductor Physics
2. Understand the principles and characteristics of different types of semiconductor devices
3. Understand the fabrication process of semiconductor devices
4. Utilize the mathematical models of semiconductor junctions for circuits and systems.
5. Identify the mathematical models of MOS transistors for circuits and systems.

### **Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). The student is declared as a pass in the course if he/she secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

#### **Continuous Internal Evaluation:**

<b>Course outcome (Course Skill Set)</b>
At the end of the course, the student will be able to : <ol style="list-style-type: none"> <li>1. Explain the basic organization of a computer system.</li> <li>2. Describe the addressing modes, instruction formats and program control statement.</li> <li>3. Explain different ways of accessing an input/ output device including interrupts.</li> <li>4. Illustrate the organization of different types of semiconductor and other secondary storage memories.</li> <li>5. Illustrate simple processor organization based on hard wired control and micro-programmed control.</li> </ol>

### **Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). The student is declared as a pass in the course if he/she secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

### **Continuous Internal Evaluation:**

- There are 25 marks for the CIE's Assignment component and 25 for the Internal Assessment Test component.
- Each test shall be conducted for 25 marks. The first test will be administered after 40-50% of the coverage of the syllabus, and the second test will be administered after 85-90% of the coverage of the syllabus. The average of the two tests shall be scaled down to 25 marks
- Any two assignment methods mentioned in the 22OB2.4, if an assignment is project-based then only one assignment for the course shall be planned. The schedule for assignments shall be planned properly by the course teacher. The teacher should not conduct two assignments at the end of the semester if two assignments are planned. Each assignment shall be conducted for 25 marks. (If two assignments are conducted then the sum of the two assignments shall be scaled down to 25 marks)
- The final CIE marks of the course out of 50 will be the sum of the scale-down marks of tests and assignment/s marks.

**Internal Assessment Test question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

### **Semester-End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**).

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions) **should have a mix of topics under that module**

### **Suggested Learning Resources:**

#### **Book**

1. Carl Hamacher, Zvonko Vranesic, Safwat Zaky: Computer Organization, 5<sup>th</sup> Edition, Tata McGrawHill, 2002.

<b>Applied Numerical Methods for EC Engineers</b>		Semester	3
Course Code	<b>BEC306D</b>	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	03
Examination type (SEE)	<b>Theory</b>		
<p><b>Course objectives:</b></p> <ul style="list-style-type: none"> <li>● To provide the knowledge and importance of error analysis in engineering problems</li> <li>● To represent and solve an application problem using a system of linear equations</li> <li>● Analyzeregression <b>data</b> to choose the most appropriate model for a situation.</li> <li>● Familiarize with the ways of solving complicated mathematical problems numerically</li> <li>● Prepare <b>to solve</b> mathematical models represented by initial or boundary value problems</li> </ul>			
<p><b>Teaching-Learning Process</b>  <b>Pedagogy (General Instructions):</b>  These are sample Strategies, teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. In addition to the traditional lecture method, different innovative teaching methods may be adopted so that the delivered lessons shall develop students' theoretical and applied Mathematical skills.</li> <li>2. State the need for Mathematics with Engineering Studies and Provide real-life examples.</li> <li>3. Support and guide the students for self-study.</li> <li>4. You will assign homework, grading assignments and quizzes, and documenting students' progress.</li> <li>5. Encourage the students to group learning to improve their creative and analytical skills.</li> <li>6. Show short related video lectures in the following ways: <ul style="list-style-type: none"> <li>● As an introduction to new topics (pre-lecture activity).</li> <li>● As a revision of topics (post-lecture activity).</li> <li>● As additional examples (post-lecture activity).</li> <li>● As an additional material of challenging topics (pre-and post-lecture activity).</li> <li>● As a model solution of some exercises (post-lecture activity).</li> </ul> </li> </ol>			
<b>Module-1: Errors in computations and Root of the equations</b>			
Approximations and Round Off -Errors in computation: Error definitions, Round-Off errors, Truncation errors and the Taylor series-The Taylor series, Error Propagation, Total numerical error, Absolute, Relative and percentage errors, Blunders, Formulation errors and data uncertainty. Roots of equations: Simple fixed point iteration methods. Secant Method, Muller's method, and Graeffe's Roots Squaring Method. Aitkin's Method. <span style="float: right;"><b>(8 hours)</b></span> <b>(RBT Levels: L1, L2 and L3)</b>			
<b>Module-2: Solution of System of Linear Equations</b>			
Rank of the matrix, Echelon form, Linearly dependent and independent equations, Solutions for linear equations, Partition method, Croute's Triangularisation method. Relaxation method. Solution of non-linear simultaneous equations by Newton-Raphson method. Eigen Values and properties, Eigen Vectors, Bounds on Eigen Values, Jacobi's method, Given's method for symmetric matrices. <span style="float: right;"><b>(8 hours)</b></span> <b>(RBT Levels: L1, L2 L3)</b>			

### **Module-3: Curve Fitting**

Least-Squares Regression: Linear Regressions, Polynomial regressions, Multiple Linear regressions, General Linear Least squares, Nonlinear Regressions, QR Factorization. Curve Fitting with Sinusoidal Functions

Introduction to Splines, Linear Splines, Quadratic Splines, Cubic Splines. Bilinear Interpolation. (8 hours)

(RBT Levels: L1, L2 L3)

### **Module-4: Numerical integration, Difference equations and Boundary Value Problems**

Romberg's method, Euler-Maclaurin formula, Gaussian integration for  $n = 2$  and  $n=3$ . Numerical double integration by trapezoidal and Simpson's 1/3 rd rule. Solution of linear difference equations.

Boundary-Value Problems, Introduction. The Shooting Method, Finite-Difference Methods (8 hours)

(RBT Levels: L1, L2 and L3)

### **Module-5: Numerical solution of partial differential equations**

Classifications of second-order partial differential equations, Finite difference approximations to partial derivatives. Solution of: Laplace equation, Poisson equations, one-dimensional heat equation and wave equations. (8 hours)

(RBT Levels: L1, L2 and L3)

### **Course outcome (Course Skill Set)**

At the end of the course, the student will be able to:

1. Explain and measure errors in numerical computations
2. Test for consistency and solve a system of linear equations.
3. Construct a function which closely fits given  $n$ -  $n$ -points of an unknown function.
4. Understand and apply the basic concepts related to solving problems by numerical differentiation and numerical integration.
5. Use appropriate numerical methods to study phenomena modelled as partial differential equations.

### **Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE, the minimum passing mark is 35% of the maximum marks (18 out of 50 marks). The student is declared as a pass in the course if he/she secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

**Continuous Internal Evaluation:**

- There are 25 marks for the CIE's Assignment component and 25 for the Internal Assessment Test component.
- Each test shall be conducted for 25 marks. The first test will be administered after 40-50% of the coverage of the syllabus, and the second test will be administered after 85-90% of the coverage of the syllabus. The average of the two tests shall be scaled down to 25 marks
- Any two assignment methods mentioned in the 22OB2.4, if an assignment is project-based then only one assignment for the course shall be planned. The schedule for assignments shall be planned properly by the course teacher. The teacher should not conduct two assignments at the end of the semester if two assignments are planned. Each assignment shall be conducted for 25 marks. (If two assignments are conducted then the sum of the two assignments shall be scaled down to 25 marks)
- The final CIE marks of the course out of 50 will be the sum of the scale-down marks of tests and assignment/s marks.

**The Internal Assessment Test question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

**Semester-End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**).

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.
4. Marks scored shall be proportionally reduced to 50 marks

**Suggested Learning Resources:**

<b>Lab VIEW Programming</b>		Semester	<b>3</b>
Course Code	<b>BEC358A</b>	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	<b>0:0:2</b>	SEE Marks	50
Credits	01	Total	100
		Exam Hours	2
Examination type (SEE)	Practical		
<b>Course objectives:</b>			
<ul style="list-style-type: none"> <li>• Aware of various front panel controls and indicators.</li> <li>• Connect and manipulate nodes and wires in the block diagram.</li> <li>• Locate various tool bars and pull-down menus for the purpose of implementing specific functions.</li> <li>• Locate and utilize the context help window.</li> <li>• Familiar with LabVIEW and different applications using it.</li> </ul>			
<b>SL.NO</b>	<b>VI Programs(using LabVIEW software)to realize the following:</b>		
1	Basic arithmetic operations: addition, subtraction, multiplication and division		
2	Boolean operations: AND, OR, XOR, NOT and NAND		
3	Sum of 'n' numbers using 'for' loop		
4	Factorial of a given number using 'for' loop		
5	Determine square of a given number		
6	Factorial of a given number using 'while' loop		
7	Sorting even numbers using 'while' loop in an array		
8	Finding the array maximum and array minimum		
Demonstration Experiments (For CIE)			
9	Build a Virtual Instrument that simulates a heating and cooling system. The system must be able to be controlled manually or automatically.		
10	Build a Virtual Instrument that simulates a Basic Calculator (using formula node).		
11	Build a Virtual Instrument that simulates a Water Level Detector.		
12	DemonstratehowtcreateabasicVIwhichcalculatetheareaandperimeterofacircle.		
<b>Course outcomes (Course Skill Set):</b>			
At the end of the course the student will be able to:			
<ul style="list-style-type: none"> <li>• Use LabVIEW to create data acquisition, analysis and display operations</li> <li>• Create user interfaces with charts, graph and buttons</li> <li>• Use the programming structures and data types that exist in LabVIEW</li> <li>• Use various editing and debugging techniques.</li> </ul>			

### Assessment Details (both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

#### Continuous Internal Evaluation (CIE):

CIE marks for the practical course are **50 Marks**.

The split-up of CIE marks for record/ journal and test are in the ratio **60:40**.

- Each experiment is to be evaluated for conduction with an observation sheet and record write-up. Rubrics for the evaluation of the journal/write-up for hardware/software experiments are designed by the faculty who is handling the laboratory session and are made known to students at the beginning of the practical session.
- Record should contain all the specified experiments in the syllabus and each experiment write-up will be evaluated for 10 marks.
- Total marks scored by the students are scaled down to **30 marks** (60% of maximum marks).
- Weightage to be given for neatness and submission of record/write-up on time.
- Department shall conduct a test of 100 marks after the completion of all the experiments listed in the syllabus.
- In a test, test write-up, conduction of experiment, acceptable result, and procedural knowledge will carry a weightage of 60% and the rest 40% for viva-voce.
- The suitable rubrics can be designed to evaluate each student's performance and learning ability.
- The marks scored shall be scaled down to **20 marks** (40% of the maximum marks).

The Sum of scaled-down marks scored in the report write-up/journal and marks of a test is the total CIE marks scored by the student.

#### Semester End Evaluation (SEE):

- SEE marks for the practical course are 50 Marks.
- **SEE shall be conducted jointly by the two examiners of the same institute, examiners are appointed by the Head of the Institute.**
- The examination schedule and names of examiners are informed to the university before the conduction of the examination. These practical examinations are to be conducted between the schedule mentioned in the academic calendar of the University.
- All laboratory experiments are to be included for practical examination.
- (Rubrics) Breakup of marks and the instructions printed on the cover page of the answer script to be strictly adhered to by the examiners. **OR** based on the course requirement evaluation rubrics shall be decided jointly by examiners.
- Students can pick one question (experiment) from the questions lot prepared by the examiners jointly.
- Evaluation of test write-up/ conduction procedure and result/viva will be conducted jointly by examiners.

General rubrics suggested for SEE are mentioned here, writeup-20%, Conduction procedure and result in -60%, Viva-voce 20% of maximum marks. SEE for practical shall be evaluated for 100 marks and scored marks shall be scaled down to 50 marks (however, based on course type, rubrics shall be decided by the examiners)

Change of experiment is allowed only once and 15% of Marks allotted to the procedure part are to be made zero.

The minimum duration of SEE is 02 hours

2. VirtualInstrumentationusingLABVIEW, SanjayGupta, JosephJohn, TMH, McGrawHill, SecondEdition, 2011.

<b>MATLAB Programming</b>		Semester	3
Course Code	<b>BEC358B</b>	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	1:0:0	SEE Marks	50
Total Hours of Pedagogy	14	Total Marks	100
Credits	01	Exam Hours	1
Examination type (SEE)	Theory		
<p><b>Course objectives:</b></p> <ul style="list-style-type: none"> <li>• Understand the MATLAB commands and functions.</li> <li>• Create and Execute the script and function files</li> <li>• Work with built in function, saving and loading data and create plots.</li> <li>• Work with the arrays, matrices, symbolic computations, files and directories.</li> <li>• Learn MATLAB programming with script, functions and language specific features.</li> </ul>			
<p><b>Teaching-Learning Process (General Instructions)</b>  These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. Adopt Problem Based Learning (PBL), which fosters students' analytical skills, develop thinking skills such as the ability to evaluate, generalize, and analyze information rather than simply recall it.</li> <li>2. Give programming assignments.</li> </ol>			
<b>Module-1</b>			
<b>Introduction:</b> Basics of MATLAB, Simple arithmetic calculations, Creating and working with arrays and numbers.			
<b>Module-2</b>			
Creating and printing simple plots, Creating, saving and executing a script file, Creating and executing a function file, Working with arrays and matrices.			
<b>Module-3</b>			
Working with anonymous functions, Symbolic Computations, Importing and exporting data, Working with files and directories.			
<b>Module-4</b>			
<b>Interactive computations:</b> Matrices and vectors, Matrix and array operations, Character strings, Command line functions, Built-in functions, Saving and loading data, Plotting simple plots.			
<b>Module-5</b>			
<b>Programming in MATLAB:</b> Script Files, Function Files, Language specific Features.			
<p><b>Course outcome (Course Skill Set)</b></p> <p>At the end of the course the student will be able to:</p> <ol style="list-style-type: none"> <li>1. Understand the syntax of MATLAB for arithmetic computations, arrays, matrices.</li> <li>2. Understand the built in function, saving and loading data, and create plots</li> <li>3. Create program using symbolic computations, Importing and exporting data and files</li> <li>4. Create program using character strings, Command line functions and Built-in functions.</li> </ol>			

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). The student is declared as a pass in the course if he/she secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together

**Continuous internal Examination (CIE)**

- For the Assignment component of the CIE, there are 25 marks and for the Internal Assessment Test component, there are 25 marks.
- The first test will be administered after 40-50% of the syllabus has been covered, and the second test will be administered after 85-90% of the syllabus has been covered
- Any two assignment methods mentioned in the 22OB2.4, if an assignment is project-based then only one assignment for the course shall be planned. The teacher should not conduct two assignments at the end of the semester if two assignments are planned.
- For the course, CIE marks will be based on a scaled-down sum of two tests and other methods of assessment.

**Internal Assessment Test question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

**Semester End Examinations (SEE)**

SEE paper shall be set for 50 questions, each of the 01 marks. The pattern of the question paper is MCQ (multiple choice questions). The time allotted for SEE is **01 hour**. The student has to secure a minimum of 35% of the maximum marks meant for SEE.

OR

MCQ (Multiple Choice Questions) are preferred for 01 credit courses, however, if course content demands the general question paper pattern that followed for 03 credit course, then

1. The question paper will have ten questions. Each question is set for 10 marks.
2. There will be 2 questions from each module. Each of the two questions under a module may or may not have the sub-questions (with maximum sub-questions of 02, with marks distributions 5+5, 4+6, 3+7).
3. The students have to answer 5 full questions, selecting one full question from each module.
4. **The duration of the examinations shall be defined by the concerned board of studies**

<b>C++ Basics</b>		Semester	4
Course Code	<b>BEC358C</b>	CIE Marks	50
Teaching Hours/Week (L: T:P: S)	0:0:2:0	SEE Marks	50
Total Hours of Pedagogy	24	Total Marks	100
Credits	1	Exam Hours	02
Examination nature (SEE)	Practical		
<b>Course objectives:</b>			
<ul style="list-style-type: none"> <li>• Understand object-oriented programming concepts, and apply them in solving problems.</li> <li>• To create, debug and run simple C++ programs.</li> <li>• Introduce the concepts of functions, friend functions, inheritance, polymorphism and function overloading.</li> <li>• Introduce the concepts of exception handling and multithreading.</li> </ul>			
<b>Sl.No</b>	<b>Experiments</b>		
1	Write a C++ program to find largest, smallest & second largest of three numbers using inline functions MAX & Min.		
2	Write a C++ program to calculate the volume of different geometric shapes like cube, cylinder and sphere using function overloading concept.		
3	Define a STUDENT class with USN, Name & Marks in 3 tests of a subject. Declare an array of 10 STUDENT objects. Using appropriate functions, find the average of the two better marks for each student. Print the USN, Name & the average marks of all the students.		
4	Write a C++ program to create class called MATRIX using two-dimensional array of integers, by overloading the operator == which checks the compatibility of two matrices to be added and subtracted. Perform the addition and subtraction by overloading + and - operators respectively. Display the results by overloading the operator <<. If (m1 == m2) then m3 = m1 + m2 and m4 = m1 - m2 else display error		
5	Demonstrate simple inheritance concept by creating a base class FATHER with data members: <i>First Name, Surname, DOB &amp; bank Balance</i> and creating a derived class SON, which inherits: Surname & Bank Balance feature from base class but provides its own feature: First Name & DOB. Create & initialize F1 & S1 objects with appropriate constructors & display the FATHER & SON details.		
6	Write a C++ program to define class name FATHER & SON that holds the income respectively. Calculate & display total income of a family using Friend function.		
7	Write a C++ program to accept the student detail such as name & 3 different marks by get_data() method & display the name & average of marks using display() method. Define a friend function for calculating the average marks using the method mark_avg().		
8	Write a C++ program to explain virtual function (Polymorphism) by creating a base class polygon which has virtual function areas two classes rectangle & triangle derived from polygon & they have area to calculate & return the area of rectangle & triangle respectively.		
9	Design, develop and execute a program in C++ based on the following requirements: An EMPLOYEE class containing data members & members functions: i) Data members: employee number (an integer), Employee_Name (a string of characters), Basic_Salary (in integer), All_Allowances (an integer), Net_Salary (an integer). (ii) Member functions: To read the data of an employee, to calculate Net_Salary & to print the values of all the data members. (All_Allowances = 123% of Basic, Income Tax (IT) =30% of gross salary (=basic_Salary_All_Allowances_IT).		
10	Write a C++ program with different class related through multiple inheritance & demonstrate the use of different access specified by means of members variables & members functions.		
11	Write a C++ program to create three objects for a class named count object with data members		

	such as roll_no & Name. Create a members function set_data ( ) for setting the data values & display ( ) member function to display which object has invoked it using „this“ pointer.
12	Write a C++ program to implement exception handling with minimum 5 exceptions classes including two built in exceptions.
<p><b>Course outcomes (Course Skill Set):</b> At the end of the course the student will be able to:</p> <ol style="list-style-type: none"> <li>1. Write C++ program to solve simple and complex problems</li> <li>2. Apply and implement major object-oriented concepts like message passing, function overloading, operator overloading and inheritance to solve real-world problems.</li> <li>3. Use major C++ features such as Templates for data type independent designs and File I/O to deal with large data set.</li> <li>4. Analyze, design and develop solutions to real-world problems applying OOP concepts of C++</li> </ol>	
<p><b>Assessment Details (both CIE and SEE)</b></p> <p>The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each course. The student has to secure not less than 35% (18 Marks out of 50) in the semester-end examination (SEE).</p> <p><b>Continuous Internal Evaluation (CIE):</b> CIE marks for the practical course is <b>50 Marks</b>. The split-up of CIE marks for record/ journal and test are in the ratio <b>60:40</b>.</p> <ul style="list-style-type: none"> <li>• Each experiment to be evaluated for conduction with observation sheet and record write-up. <p><b>Semester End Evaluation (SEE):</b> SEE marks for the practical course is 50 Marks. SEE shall be conducted jointly by the two examiners of the same institute, examiners are appointed by the University All laboratory experiments are to be included for practical examination. (Rubrics) Breakup of marks and the instructions printed on the cover page of the answer script to be strictly adhered to by the examiners. <b>OR</b> based on the course requirement evaluation rubrics shall be decided jointly by examiners. Students can pick one question (experiment) from the questions lot prepared by the internal /external examiners jointly. Evaluation of test write-up/ conduction procedure and result/viva will be conducted jointly by examiners. General rubrics suggested for SEE are mentioned here, writeup-20%, Conduction procedure and</p>	

result in -60%, Viva-voce 20% of maximum marks. SEE for practical shall be evaluated for 100 marks and scored marks shall be scaled down to 50 marks (however, based on course type, rubrics shall be decided by the examiners)

Change of experiment is allowed only once and 15% Marks allotted to the procedure part to be made zero.

The duration of SEE is 03 hours

Rubrics suggested in Annexure-II of Regulation book

**Suggested Learning Resources:**

1. Object oriented programming in TURBO C++, Robert Lafore, Galgotia Publications, 2002
2. The Complete Reference C++, Herbert Schildt, 4<sup>th</sup> Edition, Tata McGraw Hill, 2003.
3. Object Oriented Programming with C++, E Balaguruswamy, 4<sup>th</sup> Edition, Tata McGraw Hill, 2006.

<b>IoT for Smart Infrastructure</b>		Semester	3
Course Code	<b>BEC358D</b>	CIE Marks	50
Teaching Hours/Week (L: T:P: S)	1:0:0:0	SEE Marks	50
Total Hours of Pedagogy	14	Total Marks	100
Credits	01	Exam Hours	1
Examination type (SEE)	Theory/Practical		

### Course objectives:

- To provide an understanding of the concepts, principles, and applications of IoT in the context of smart infrastructure.
- To explore the role of IoT technologies in transforming infrastructure into smart, efficient, and sustainable systems and analyse the challenges, opportunities, and considerations in implementing IoT for smart infrastructure.
- To examine real-world case studies and successful implementations of IoT in smart cities, buildings, transportation, and energy management and explore future trends and emerging technologies shaping the field of IoT for smart infrastructure.

### Teaching-Learning Process (General Instructions)

These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.

- **Interactive Lectures:** Conduct interactive lectures to present the theoretical concepts and foundational knowledge of IoT for smart infrastructure.
- **Case Studies and Group Discussions:** Utilize case studies to analyse real-world implementations of IoT in smart infrastructure projects. Divide students into groups and assign them specific cases to discuss and analyse.
- **Hands-on Workshops and Simulations:** Organize hands-on workshops or simulations where students can interact with IoT devices and technologies relevant to smart infrastructure.
- **Guest Lectures and Industry Experts:** Invite guest speakers or industry experts who have hands-on experience in implementing IoT in smart infrastructure projects. They can share their insights, challenges, and success stories, providing students with a real-world perspective
- **Project-Based Learning:** Assign students to work on individual or group projects related to IoT for smart infrastructure. Provide a project brief with specific objectives and deliverables. Students can apply their knowledge and skills to design, develop, or analyse IoT solutions for smart infrastructure challenges.

### Module-1

#### Introduction to IoT and Smart Infrastructure

Introduction to IoT: Definition of IoT and its basic components, Overview of IoT applications in various industries, Importance of IoT in transforming infrastructure.

Smart Infrastructure Overview: Introduction to smart infrastructure and its key components, Benefits and challenges of implementing smart infrastructure, Case studies showcasing successful smart infrastructure projects.

IoT Technologies for Smart Infrastructure: Sensors and actuators: Types, functionalities, and applications; Communication protocols: Wi-Fi, Bluetooth, cellular networks, and their use in IoT;

Cloud computing and data analytics in IoT for infrastructure; Edge computing: Real-time decision-making at the edge.

Security and Privacy in IoT for Smart Infrastructure: Security challenges and threats in IoT, Privacy considerations and data protection in smart infrastructure, best practices and solutions for ensuring IoT security and privacy.

## **Module-2**

### **IoT Applications in Smart Cities**

Introduction to Smart Cities - Definition and key features of smart cities, Role of IoT in transforming cities into smart cities, Benefits and challenges of smart city implementations.

IoT Applications in Smart City Infrastructure - Smart transportation: Intelligent traffic management and transportation systems, Smart buildings: Energy management and occupant comfort; Smart grids: Optimizing energy distribution and consumption; Waste management, water management, and environmental monitoring.

Case Studies of Smart City Implementations: Showcase of successful smart city projects around the world; Analysis of the IoT technologies and strategies implemented; Lessons learned from these case studies.

Future Trends in Smart Cities: Emerging technologies shaping the future of smart cities, Role of IoT, AI, and 5G in advancing smart city infrastructure, Opportunities and challenges for future smart city developments.

## **Module-3**

### **IoT Applications in Smart Buildings**

Introduction to Smart Buildings: Definition and key features of smart buildings, Benefits of IoT in improving energy efficiency and occupant comfort, Challenges and considerations in implementing smart building technologies.

IoT Technologies for Smart Buildings: Building automation systems and controls; Energy management and monitoring using IoT devices; Indoor environmental quality monitoring and optimization; Smart lighting and HVAC systems.

Case Studies of Smart Building Implementations: Showcase of successful smart building projects; Analysis of IoT technologies and solutions deployed; Lessons learned from these case studies.

Future Trends in Smart Buildings: Emerging technologies for smart buildings; Integration of IoT with AI and machine learning; Potential impact of 5G on smart building applications.

## **Module-4**

### **IoT Applications in Smart Transportation**

Introduction to Smart Transportation: Definition and key features of smart transportation; Role of IoT in intelligent traffic management and transportation systems; Challenges and opportunities in implementing smart transportation solutions.

IoT Technologies for Smart Transportation: Traffic sensors and monitoring systems; Intelligent transportation systems (ITS); Vehicle-to-vehicle (V2V) and vehicle-to-infrastructure (V2I) communication; Real-time data analysis and predictive analytics.

Case Studies of Smart Transportation Implementations: Showcase of successful smart transportation projects; Analysis of IoT technologies and solutions deployed; Lessons learned from these case studies.

Future Trends in Smart Transportation: Emerging technologies shaping the future of smart transportation; Role of IoT, AI, and autonomous vehicles; Potential impact of 5G on smart transportation applications.

## **Module-5**

### **IoT for Smart Grids and Energy Management**

Introduction to Smart Grids: Definition and key features of smart grids; Role of IoT in optimizing energy distribution and consumption; Benefits and challenges of smart grid implementations. IoT Technologies for Smart Grids: Smart meters and energy monitoring devices; Demand response and load management; Grid optimization and fault detection using IoT; Renewable energy integration and grid stability.

Case Studies of Smart Grid Implementations: Showcase of successful smart grid projects, Analysis of IoT technologies and solutions deployed, Lessons learned from these case studies.

Future Trends in Smart Grids and Energy Management: Emerging technologies for smart grids; Integration of IoT, AI, and blockchain in energy management; Potential impact of 5G on smart grid applications.

### **Course outcome (Course Skill Set)**

At the end of the course the student will be able to:

- Define and explain the core concepts and components of IoT and its relevance to smart infrastructure. Identify and evaluate the key technologies and communication protocols used in IoT for smart infrastructure.
- Assess the benefits, challenges, and ethical considerations associated with implementing IoT in smart infrastructure projects and analyse & compare different IoT applications in smart cities, buildings, transportation, and energy management.
- Examine real-world case studies of successful IoT implementations in smart infrastructure and extract lessons learned. Demonstrate an understanding of security and privacy considerations in IoT for smart infrastructure.
- Discuss the impact of emerging technologies, such as artificial intelligence and 5G, on the future of IoT in smart infrastructure. Apply knowledge and critical thinking skills to propose IoT-based solutions for smart infrastructure challenges.
- Work effectively in teams to analyse, design, and present IoT projects related to smart infrastructure and communicate effectively and articulate the potential benefits and limitations of IoT for smart infrastructure.

### **Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

### **Continuous internal Examination (CIE)**

- For the Assignment component of the CIE, there are 25 marks and for the Internal Assessment Test component, there are 25 marks.
- The first test will be administered after 40-50% of the syllabus has been covered, and the second test will be administered after 85-90% of the syllabus has been covered
- Any two assignment methods mentioned in the 22OB2.4, if an assignment is project-based then only one assignment for the course shall be planned. The teacher should not conduct two assignments at the end of the semester if two assignments are planned.
- For the course, CIE marks will be based on a scaled-down sum of two tests and other methods of assessment.

**Internal Assessment Test question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

### **Semester End Examinations (SEE)**

SEE paper shall be set for 50 questions, each of the 01 marks. The pattern of the question paper is MCQ (multiple choice questions). The time allotted for SEE is **01 hour**. The student has to secure a minimum of 35% of the maximum marks meant for SEE.

**OR**

~~MCQ (Multiple Choice Questions) are preferred for 01 credit courses, however, if course content demands the general question paper pattern that followed for 03 credit course, then~~

- ~~1. The question paper will have ten questions. Each question is set for 10 marks.~~
- ~~2. There will be 2 questions from each module. Each of the two questions under a module may or may not have the sub-questions (with maximum sub-questions of 02, with marks distributions 5+5, 4+6, 3+7).~~
- ~~3. The students have to answer 5 full questions, selecting one full question from each module.~~

### **Suggested Learning Resources:**

1. MindMatrix.io
2. "Internet of Things (A Hands-on-Approach)" by Arshdeep Bahga and Vijay Madisetti
3. "Building the Internet of Things: Implement New Business Models, Disrupt Competitors, Transform Your Industry" by Maciej Kranz
4. "Smart Cities: Big Data, Civic Hackers, and the Quest for a New Utopia" by Anthony M. Townsend

5. "Internet of Things for Architects: Architecting IoT solutions by implementing sensors, communication infrastructure, edge computing, analytics, and security" by Perry Lea.

**Web links and Video Lectures (e-Resources):**

- [makes.mindmatrix.io](https://makes.mindmatrix.io)

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

- **Sensor Deployment and Data Collection:** Organize a hands-on activity where participants work in groups to deploy sensors in a simulated smart infrastructure environment.
- **Smart City Simulation Game:** Develop a simulation game where participants take on different roles representing stakeholders in a smart city.
- **IoT Solution Design Challenge:** Assign participants to design an IoT-based solution for a specific smart infrastructure problem. They can work individually or in teams to identify the problem, propose an IoT solution, outline the required components and technologies, and create a prototype or presentation.
- **Security and Privacy Risk Assessment:** Conduct a group activity where participants analyse the security and privacy risks associated with IoT deployments in smart infrastructure.
- **Field Visit to Smart Infrastructure Project:** Organize a field visit to a smart infrastructure project, such as a smart building, smart city district, or IoT-enabled transportation system.

<b>Module-1</b>			
<p>Revision of Vector Calculus – (Text 1: Chapter 1)  <b>Coulomb's Law, Electric Field Intensity and Flux density:</b> Experimental law of Coulomb, Electric field intensity, Field due to continuous volume charge distribution, Field of a line charge, Field due to Sheet of charge, Electric flux density, Numerical Problems. (Text: Chapter 2.1 to 2.5, 3.1) <b>RBT Level:</b> L1, L2, L3</p>			
<b>Module-2</b>			

**Gauss's Law and Divergence:** Gauss 'law, Application of Gauss' law to Point Charge, line charge, Surface charge and Volume Charge, Point (differential) form of Gauss law, Divergence. Maxwell's First Equation (Electrostatics), Vector Operator  $\nabla$  and divergence theorem, Numerical Problems (**Text: Chapter 3.2 to 3.7**).

Energy expended or work done in moving a point charge in an

#### Module-3

**Poisson's and Laplace's Equations:** Derivation of Poisson's and Laplace's Equations, Examples of the solution of Laplace's equation, Numerical problems on Laplace's equation (**Text: Chapters 7.1 and 7.3**)

**Steady Magnetic Field:** Biot-Savart Law, Ampere's circuital law, Curl, Stokes' theorem, Magnetic flux and magnetic flux density.

(**Text: Chapters 8.1 to 8.5**) **RBT Level:** L1, L2, L3

#### Module-4

**Magnetic Forces:** Force on a moving charge, differential current elements, Force between differential current elements, Numerical problems (**Text: Chapter 9.1 to 9.3**).

**Magnetic Materials:** Magnetization and permeability, Magnetic boundary conditions, the magnetic circuit, problems (**Text: Chapter 9.6 to 9.8**) **RBT Level:** L1, L2, L3

#### Module-5

Faraday's law of Electromagnetic Induction –Integral form and Point form, Numerical problems. Inconsistency of Ampere's law with continuity equation, displacement current, Conduction current, Derivation of Maxwell's equations in point form, and integral form, Maxwell's equations for different media, Numerical problems (**Text: Chapter 10.1 to 10.4**)

**Uniform Plane Wave:** Wave propagation in free space, Uniform plane wave, Derivation of plane wave equations from Maxwell's equations, Poynting's Theorem and wave power, Skin effect or Depth of penetration, Numerical problems. (**Text: Chapter 12.1, 12.3, 12.4**) **RBT Level:** L1, L2, L3

#### Course outcome (Course Skill Set)

At the end of the course the student will be able to:

1. Evaluate problems on electrostatic force, electric field due to point, linear, volume charges by applying conventional methods and charge in a volume.
2. Apply Gauss law to evaluate Electric fields due to different charge distributions and Volume Charge distribution by using Divergence Theorem.
3. Determine potential and energy with respect to point charge and capacitance using Laplace equation and Apply Biot-Savart's and Ampere's laws for evaluating Magnetic field for different current configurations
4. Calculate magnetic force, potential energy and Magnetization with respect to magnetic materials and voltage induced in electric circuits.
5. Apply Maxwell's equations for time varying fields, EM waves in free space and conductors and Evaluate power associated with EM waves using Poynting theorem

### **Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). The student is declared as a pass in the course if he/she secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

#### **Continuous Internal Evaluation:**

- There are 25 marks for the CIE's Assignment component and 25 for the Internal Assessment Test component.
- Each test shall be conducted for 25 marks. The first test will be administered after 40-50% of the coverage of the syllabus, and the second test will be administered after 85-90% of the coverage of the syllabus. The average of the two tests shall be scaled down to 25 marks
- Any two assignment methods mentioned in the 220B2.4, if an assignment is project-based then only one assignment for the course shall be planned. The schedule for assignments shall be planned properly by the course teacher. The teacher should not conduct two assignments at the end of the semester if two assignments are planned. Each assignment shall be conducted for 25 marks. (If two assignments are conducted then the sum of the two assignments shall be scaled down to 25 marks)
- The final CIE marks of the course out of 50 will be the sum of the scale-down marks of tests and assignment/s marks.

**Internal Assessment Test question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

#### **Semester-End Examination:**

Theory SEE will be conducted by the University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**).

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.
4. Marks scored shall be proportionally reduced to 50 marks

#### MODULE-4

**Digital Representation of Analog Signals:** Introduction, Why Digitize Analog Sources?, The Sampling process, Pulse Amplitude Modulation, Time-Division Multiplexing, Pulse Position Modulation: Generation and Detection of PPM wave. The Quantization Process. Pulse Code Modulation: Sampling, Quantization, Encoding, line Codes, Differential encoding, Regeneration, Decoding, filtering, multiplexing.

**[Text2: 7.1,7.2,7.3,7.4,7.5,7.6,7.8,7.9]**

**RBT: L1,L2,L3**

#### MODULE-5

**Baseband Transmission of Digital signals:** Introduction, Intersymbol Interference, Eye Pattern, Nyquist criterion for distortionless Transmission, Baseband M-ary PAM Transmission.

**[Text2:8.1,8.4,8.5,8.6,8.7]**

**Noise:** Signal to Noise Ratio, External Noise, Internal Noise, Semiconductor Noise, Expressing Noise Levels, Noise in Cascade Stages.

**[Text1:9.5]**

**RBT:L1,L2,L3**

**PRACTICAL COMPONENT OF IPCC** (*Experiments can be conducted using MATLAB/SCILAB/OCTAVE*)

Sl.NO	Experiments
1	Basic Signals and Signal Graphing: a) unit Step, b) Rectangular, c) standard triangle d) sinusoidal and e) Exponential signal.
2	Illustration of signal representation in time and frequency domains for a rectangular pulse.
3	Amplitude Modulation and demodulation: Generation and display the relevant signals and its spectrums.
4	Frequency Modulation and demodulation: Generation and display the relevant signals and its spectrums.
5	Sampling and reconstruction of low pass signals. Display the signals and its spectrum.
6	Time Division Multiplexing and demultiplexing.
7	PCM Illustration: Sampling, Quantization and Encoding
8	Generate a)NRZ, RZ and Raised cosine pulse, b) Generate and plot eye diagram
9	Generate the Probability density function of Gaussian distribution function.
10	Display the signal and its spectrum of an audio signal.

**Course outcomes (Course Skill Set):**

At the end of the course, the student will be able to:

1. Understand the principles of analog communication systems and noise modelling.
2. Identify the schemes for analog modulation and demodulation and compare their performance.
3. Design of PCM systems through the processes sampling, quantization and encoding.
4. Describe the ideal condition, practical considerations of the signal representation for baseband transmission of digital signals.
5. Identify and associate the random variables and random process in Communication system design.

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). The student is declared as a pass in the course if he/she secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

The IPCC means the practical portion integrated with the theory of the course. CIE marks for the theory component are **25 marks** and that for the practical component is **25 marks**.

**CIE for the theory component of the IPCC**

- 25 marks for the theory component are split into **15 marks** for two Internal Assessment Tests (Two Tests, each of 15 Marks with 01-hour duration, are to be conducted) and **10 marks** for other assessment methods mentioned in 22OB4.2. The first test at the end of 40-50% coverage of the syllabus and the second test after covering 85-90% of the syllabus.
- Scaled-down marks of the sum of two tests and other assessment methods will be CIE marks for the theory component of IPCC (that is for **25 marks**).
- The student has to secure 40% of 25 marks to qualify in the CIE of the theory component of IPCC.

### **CIE for the practical component of the IPCC**

- **15 marks** for the conduction of the experiment and preparation of laboratory record, and **10 marks** for the test to be conducted after the completion of all the laboratory sessions.
- On completion of every experiment/program in the laboratory, the students shall be evaluated including viva-voce and marks shall be awarded on the same day.
- The CIE marks awarded in the case of the Practical component shall be based on the continuous evaluation of the laboratory report. Each experiment report can be evaluated for 10 marks. Marks of all experiments' write-ups are added and scaled down to **15 marks**.
- The laboratory test (**duration 02/03 hours**) after completion of all the experiments shall be conducted for 50 marks and scaled down to **10 marks**.
- Scaled-down marks of write-up evaluations and tests added will be CIE marks for the laboratory component of IPCC for **25 marks**.
- The student has to secure 40% of 25 marks to qualify in the CIE of the practical component of the IPCC.

### **SEE for IPCC**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.
4. Marks scored by the student shall be proportionally scaled down to 50 Marks

**The theory portion of the IPCC shall be for both CIE and SEE, whereas the practical portion will have a CIE component only. Questions mentioned in the SEE paper may include questions from the practical component.**

- The minimum marks to be secured in CIE to appear for SEE shall be 10 (40% of maximum marks-25) in the theory component and 10 (40% of maximum marks -25) in the practical component. The laboratory component of the IPCC shall be for CIE only. However, in SEE, the questions from the laboratory component shall be included. The maximum of 04/05 sub-questions are to be set from the practical component of IPCC, the total marks of all questions should not be more than 20 marks.
- SEE will be conducted for 100 marks and students shall secure 35% of the maximum marks to qualify for the SEE. Marks secured will be scaled down to 50.
- The student is declared as a pass in the course if he/she secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

<p><b>Teaching-Learning Process (General Instructions)</b></p> <p>These are sample Strategies, which teacher can use to accelerate the attainment of the various course outcomes.</p> <ul style="list-style-type: none"> <li>• Lecture method (L) does not mean only traditional lecture method, but different type of teaching methods may be adopted to develop the outcomes.</li> <li>• Show Video/animation films to explain the different concepts of Linear Algebra &amp; Signal Processing.</li> <li>• Encourage collaborative (Group) Learning in the class.</li> <li>• Ask at least three HOTS (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>• Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop thinking skills such as the ability to evaluate, generalize, and analyze information rather than simply recall it.</li> <li>• Topics will be introduced in a multiple representation.</li> <li>• Show the different ways to solve the same problem and encourage the students to come up with their own creative ways to solve them.</li> <li>• Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> <li>• Adopt Flipped class technique by sharing the materials / Sample Videos prior to the class and have discussions on the that topic in the succeeding classes.</li> <li>• Give Programming Assignments.</li> </ul>			
<b>Module-1</b>			
<p><b>Introduction to Control Systems:</b> Types of Control Systems, Effect of Feedback Systems, Differential equation of Physical Systems -Mechanical Systems, Electrical Systems, Analogous Systems. (Textbook 1: Chapter 1.1, 2.2)</p>			
<b>Teaching-Learning Process</b>	Chalk and Talk, YouTube videos <b>RBT Level:</b> L1, L2, L3		

<b>Module-2</b>	
<b>Block diagrams and signal flow graphs:</b> Transfer functions, Block diagram algebra and Signal Flow graphs. (Textbook 1: Chapter 2.4, 2.5, 2.6)	
<b>Teaching-Learning Process</b>	Chalk and Talk, YouTube videos, Any software tool to implement block diagram reduction techniques and Signal Flow graphs <b>RBT Level:</b> L1, L2, L3
<b>Module-3</b>	
<b>Time Response of feedback control systems:</b> Standard test signals, Unit step response of First and Second order Systems. Time response specifications, Time response specifications of second order systems, steady state errors and error constants. Introduction to PI, PD and PID Controllers (excluding design). (Textbook 1: Chapter 5.3, 5.4, 5.5)	
<b>Teaching-Learning Process</b>	Chalk and Talk, YouTube videos, Any software tool to show time response for various transfer functions and PI, PD and PID controllers. <b>RBT Level:</b> L1, L2, L3
<b>Module-4</b>	
<b>Stability analysis:</b> Concepts of stability, Necessary conditions for Stability, Routh stability criterion, Relative stability analysis: more on the Routh stability criterion. <b>Introduction to Root-Locus Techniques,</b> The root locus concepts, Construction of root loci. (Textbook 1: Chapter 6.1, 6.2, 6.4, 6.5, 7.1, 7.2, 7.3)	
<b>Teaching-Learning Process</b>	Chalk and Talk, YouTube videos, Any software tool to plot Root locus for various transfer functions <b>RBT Level:</b> L1, L2, L3
<b>Module-5</b>	
<b>Frequency domain analysis and stability:</b> Correlation between time and frequency response, Bode Plots, Experimental determination of transfer function. (Textbook 1: Chapter 4: 8.1, 8.2, 8.4) Mathematical preliminaries, Nyquist Stability criterion, (Stability criteria related to polar plots are excluded) (Textbook 1: 9.2, 9.3) <b>State Variable Analysis:</b> Introduction to state variable analysis: Concepts of state, state variable and state models. State model for Linear continuous –Time systems, solution of state equations. (Textbook 1: 12.2, 12.3, 12.6)	
<b>Teaching-Learning Process</b>	Chalk and Talk, YouTube videos, Any software tool to draw Bode plot for various transfer functions <b>RBT Level:</b> L1, L2, L3

<b>PRACTICAL COMPONENT OF IPCC</b>	
Using suitable simulation software (P-Spice/ MATLAB / Python / Scilab / OCTAVE / LabVIEW) demonstrate the operation of the following circuits:	
Sl.No	Experiments
1	Implement Block diagram reduction technique to obtain transfer function a control system.
2	Implement Signal Flow graph to obtain transfer function a control system.
3	Simulation of poles and zeros of a transfer function.
4	Implement time response specification of a second order Under damped System, for different damping factors.
5	Implement frequency response of a second order System.
6	Implement frequency response of a lead lag compensator.
7	Analyze the stability of the given system using Routh stability criterion.
8	Analyze the stability of the given system using Root locus.
9	Analyze the stability of the given system using Bode plots.
10	Analyze the stability of the given system using Nyquist plot.
11	Obtain the time response from state model of a system.
12	Implement PI and PD Controllers.

## Course Outcomes

At the end of the course the student will be able to:

1. Deduce transfer function of a given physical system, from differential equation representation or Block Diagram representation and SFG representation.
2. Calculate time response specifications and analyse the stability of the system.
3. Draw and analyse the effect of gain on system behaviour using root loci.
4. Perform frequency response Analysis and find the stability of the system.
5. Represent State model of the system and find the time response of the system.

## Assessment Details (both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together

## CIE for the theory component of IPCC

Two Tests each of **20 Marks (duration 01 hour)**

- First test at the end of 5<sup>th</sup> week of the semester
- Second test at the end of the 10<sup>th</sup> week of the semester

Two assignments each of **10 Marks**

- First assignment at the end of 4<sup>th</sup> week of the semester
- Second assignment at the end of 9<sup>th</sup> week of the semester

Scaled-down marks of two tests and two assignments added will be CIE marks for the theory component of IPCC for **30 marks**.

## CIE for the practical component of IPCC

- On completion of every experiment/program in the laboratory, the students shall be evaluated and marks shall be awarded on the same day. The **15 marks** are for conducting the experiment and preparation of the laboratory record, the other **05 marks shall be for the test** conducted at the end of the semester.
- The CIE marks awarded in the case of the Practical component shall be based on the continuous evaluation of the laboratory report. Each experiment report can be evaluated for 10 marks. Marks of all experiments' write-ups are added and scaled down to 15 marks.
- The laboratory test (**duration 03 hours**) at the end of the 15<sup>th</sup> week of the semester /after completion of all the experiments (whichever is early) shall be conducted for 50 marks and scaled down to 05 marks.
- Scaled-down marks of write-up evaluations and tests added will be CIE marks for the laboratory component of IPCC for **20 marks**.

**SEE for IPCC**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (duration 03 hours)

- The question paper will have ten questions. Each question is set for 20 marks.
- There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
- The students have to answer 5 full questions, selecting one full question from each module.

**The theory portion of the IPCC shall be for both CIE and SEE, whereas the practical portion will have a CIE component only. Questions mentioned in the SEE paper shall include questions from the practical component.**

- The minimum marks to be secured in CIE to appear for SEE shall be the 12 (40% of maximum marks-30) in the theory component and 08 (40% of maximum marks -20) in the practical component. The laboratory component of the IPCC shall be for CIE only. However, in SEE, the questions from the laboratory component shall be included. The maximum of 04/05 questions to be set from the practical component of IPCC, the total marks of all questions should not be more than the 20 marks.

SEE will be conducted for 100 marks and students shall secure 35% of the maximum marks to qualify in the SEE. Marks secured out of 100 shall be reduced proportionally to 50.

**Suggested Learning Resources:****Text Books**

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

*Programming Assignments / Mini Projects can be given to improve programming skills*

<b>Communication Laboratory</b>		Semester	4
Course Code	<b>BECL404</b>	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	0:0:2	SEE Marks	50
Credits	01	Exam Hours	03
Examination type (SEE)	Theory/Practical/Viva-Voce /Term-work/Others		
<b>Course objectives:</b>			
This laboratory course enables students to			
<ul style="list-style-type: none"> <li>• Understand the basic concepts of AM and FM modulation and demodulation.</li> <li>• Design and analyse the electronic circuits used for AM and FM modulation and demodulation circuits.</li> <li>• Understand the sampling theory and design circuits which enable sampling and reconstruction of analog signals.</li> <li>• Design electronic circuits to perform pulse amplitude modulation, pulse position modulation and pulse width modulation.</li> </ul>			
<b>Experiments</b> (Experiments to be conducted using hardware components)			
1	Design and test a high-level collector Modulator circuit and Demodulation the signal using diode detector.		
2	Test the Balanced Modulator / Lattice Modulator (Diode ring)		
3	Design a Frequency modulator using VCO and FM demodulator using PLL (Use IC566 and IC565).		
4	Design and plot the frequency response of Preemphasis and Deemphasis Circuits		
5	Design and test BJT/FET Mixer		
6	Design and test Pulse sampling, flat top sampling and reconstruction		
7	Design and test Pulse amplitude modulation and demodulation.		
8	Generation and Detection of Pulse position Modulation		
9	Generation and Detection of Pulse Width Modulation		
10	PLL Frequency Synthesizer		
11	Data formatting and Line Code Generation		
12	PCM Multiplexer and Demultiplexer		
<b>Course outcomes (Course Skill Set):</b>			
At the end of the course the student will be able to:			
<ol style="list-style-type: none"> <li>1. Illustrate the AM generation and detection using suitable electronic circuits.</li> <li>2. Design of FM circuits for modulation, demodulation and noise suppression.</li> <li>3. Design and test the sampling, Multiplexing and pulse modulation techniques using electronic hardware.</li> <li>4. Design and Demonstrate the electronic circuits used for RF transmitters and receivers.</li> </ol>			

### **Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

#### **Continuous Internal Evaluation (CIE):**

CIE marks for the practical course are **50 Marks**.

The split-up of CIE marks for record/ journal and test are in the ratio **60:40**.

- Each experiment is to be evaluated for conduction with an observation sheet and record write-up. Rubrics for the evaluation of the journal/write-up for hardware/software experiments are designed by the faculty who is handling the laboratory session and are made known to students at the beginning of the practical session.
- Record should contain all the specified experiments in the syllabus and each experiment write-up will be evaluated for 10 marks.
- Total marks scored by the students are scaled down to **30 marks** (60% of maximum marks).
- Weightage to be given for neatness and submission of record/write-up on time.
- Department shall conduct a test of 100 marks after the completion of all the experiments listed in the syllabus.
- In a test, test write-up, conduction of experiment, acceptable result, and procedural knowledge will carry a weightage of 60% and the rest 40% for viva-voce.
- The suitable rubrics can be designed to evaluate each student's performance and learning ability.
- The marks scored shall be scaled down to **20 marks** (40% of the maximum marks).

The Sum of scaled-down marks scored in the report write-up/journal and marks of a test is the total CIE marks scored by the student.

#### **Semester End Evaluation (SEE):**

- SEE marks for the practical course are 50 Marks.
- **SEE shall be conducted jointly by the two examiners of the same institute, examiners are appointed by the Head of the Institute.**
- The examination schedule and names of examiners are informed to the university before the conduction of the examination. These practical examinations are to be conducted between the schedule mentioned in the academic calendar of the University.
- All laboratory experiments are to be included for practical examination.
- (Rubrics) Breakup of marks and the instructions printed on the cover page of the answer script to be strictly adhered to by the examiners. **OR** based on the course requirement evaluation rubrics shall be decided jointly by examiners.
- Students can pick one question (experiment) from the questions lot prepared by the examiners jointly.
- Evaluation of test write-up/ conduction procedure and result/viva will be conducted jointly by examiners.

General rubrics suggested for SEE are mentioned here, writeup-20%, Conduction procedure and result in -60%, Viva-voce 20% of maximum marks. SEE for practical shall be evaluated for 100 marks and scored marks shall be scaled down to 50 marks (however, based on course type, rubrics shall be decided by the examiners)

Change of experiment is allowed only once and 15% of Marks allotted to the procedure part are to be made zero.

The minimum duration of SEE is 02 hours

### **Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). The student is declared as a pass in the course if he/she secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

#### **Continuous Internal Evaluation:**

- There are 25 marks for the CIE's Assignment component and 25 for the Internal Assessment Test component.
- Each test shall be conducted for 25 marks. The first test will be administered after 40-50% of the coverage of the syllabus, and the second test will be administered after 85-90% of the coverage of the syllabus. The average of the two tests shall be scaled down to 25 marks
- Any two assignment methods mentioned in the 22OB2.4, if an assignment is project-based then only one assignment for the courses shall be planned. The schedule for assignments shall be planned properly by the course teacher. The teacher should not conduct two assignments at the end of the semester if two assignments are planned. Each assignment shall be conducted for 25 marks. (If two assignments are conducted then the sum of the two assignments shall be scaled down to 25 marks)
- The final CIE marks of the course out of 50 will be the sum of the scale-down marks of tests and assignment/s marks.

**Internal Assessment Test question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

#### **Semester-End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**).

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.
4. Marks scored shall be proportionally reduced to 50 marks

#### Module-4

**MEMS Devices:** Sensing and Measuring Principles, Capacitive Sensing, Resistive Sensing, Piezoelectric Sensing, Thermal Transducers, Optical Sensors, Magnetic Sensors, MEMS Actuation Principles, Electrostatic Actuation, Thermal Actuation, Piezoelectric Actuation, Magnetic Actuation, MEMS Devices Inertial Sensors, Pressure Sensors, Radio Frequency MEMS: Capacitive Switches and Phase Shifters, Microfluidic Components, Optical Devices. **(Text book 2: 13.1, 13.3, 13.4)**

**MEMS Applications:** Introduction, Industrial, Automotive, Biomedical **(Text book 2:15.1, 15.2, 15.3, 15.4)**

#### Module-5

**Protections of Devices and Circuits:** Cooling and Heat sinks, Thermal Modeling of Power Switching Devices, Electrical Equivalent Thermal model, Mathematical Thermal Equivalent Circuit, Coupling of Electrical and Thermal Components, Snubber circuits, Voltage protection by Selenium Diodes and Metaloxide Varistors, Current protection, Fusing, Fault current with AC source, Fault current with DC source, Electromagnetic Interference, sources of EMI, Minimizing EMI Generation, EMI shielding, EMI standards **(Text book 1: 17.2, 17.3, 17.4, 17.5, 17.6, 17.7, 17.8, 17.9).**

#### Course outcome (Course Skill Set)

At the end of the course, the student will be able to :

1. Explain different types of industrial power devices such as MOSFET, BJT, IGBT etc, their structure, and its operating characteristics.
2. Design and analyse the power electronic circuits such as switch mode regulators, inverters, controlled rectifiers and ac voltage controllers.
3. Explain various types of MEMS devices used for sensing pressure, temperature, current, voltage, humidity, vibration etc..
4. Familiarize with soft core processors such as ASIC and FPGA.
5. Familiarize with computer hardware, software, architecture, instruction set, memory organization, multiprocessor architecture.
6. Apply protective methods for devices various industrial power devices based on thermal requirements and develop protective methods for the circuits against various electrical parameters.

#### Assessment Details (both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). The student is declared as a pass in the course if he/she secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

#### Continuous Internal Evaluation:

- There are 25 marks for the CIE's Assignment component and 25 for the Internal Assessment Test component.
- Each test shall be conducted for 25 marks. The first test will be administered after 40-50% of the coverage of the syllabus, and the second test will be administered after 85-90% of the coverage of the syllabus. The average of the two tests shall be scaled down to 25 marks
- Any two assignment methods mentioned in the 22OB2.4, if an assignment is project-based then only one assignment for the course shall be planned. The schedule for assignments shall be planned properly by the course teacher. The teacher should not conduct two assignments at the end of the semester if two assignments are planned. Each assignment shall be conducted for 25 marks. (If two assignments are conducted then the sum of the two assignments shall be scaled down to 25 marks)
- The final CIE marks of the course out of 50 will be the sum of the scale-down marks of tests and assignment/s marks.

**Internal Assessment Test question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

**Semester-End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**).

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.
4. Marks scored shall be proportionally reduced to 50 marks

**Suggested Learning Resources:**

**Text Books**

1. Power Electronics: Devices, Circuits, and Applications, Muhammad H. Rashid, Pearson, 4<sup>th</sup> International edition.
2. Fundamentals of Industrial Electronics , Bogdan M. Wilamowski, J. David Irwin, CRC Press, 2011,

**Reference Books**

1. Thomas E. Kissell, Industrial Electronics: Applications for Programmable Controllers, Instrumentation and Process Control, and Electrical Machines and Motor Controls, 3rd edition, 2003, Prentice Hall.
2. Ned Mohan, T.M. Undeland and W.P. Robbins, "Power Electronics: Converters, Applications and Design", Wiley India Ltd, 2008.

- Quiz and Seminars

<b>OPERATING SYSTEM</b>		Semester	4
Course Code	<b>BEC405C</b>	CIE Marks	50
Teaching Hours/Week(L:T:P)	3:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	3
Examination type(SEE)	Theory		
<p><b>Course objectives:</b> This course will enable students to:</p> <ul style="list-style-type: none"> <li>• Understand the services provided by an operating system.</li> <li>• Explain how processes are synchronized and scheduled.</li> <li>• Understand different approaches of memory management and virtual memory management. Describe the structure and organization of the file system</li> <li>• Understand interprocess communication and deadlock situations.</li> </ul>			
<p><b>Teaching-Learning Process(General Instructions)</b></p> <p>The samples strategies, which the teacher can use to accelerate the attainment of the various course outcomes are listed in the following:</p> <ol style="list-style-type: none"> <li>1. Lecturer method (L) need not to be only traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same problem and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
			<b>RBT Level</b>
<b>Module-1</b>			
<p><b>Introduction to Operating Systems:</b> OS, Goals of an OS, Operation of an OS, Computational Structures, Resource allocation techniques, Efficiency, System Performance and User Convenience, Classes operating System, Batch processing, Multi programming, Time Sharing Systems, Real Time and distributed Operating Systems <b>(Topics from Sections 1.2, 1.3, 2.2 to 2.8 of Text).</b></p>			<b>L1,L2</b>
<b>Module-2</b>			
<p><b>Process Management:</b> OS View of Processes, PCB, Fundamental State Transitions of a process, Threads, Kernel and User level Threads, Non-preemptive scheduling- FCFS and SRN, Preemptive Scheduling- RR and LCN, Scheduling in Unix and Scheduling in Linux <b>(Topics from Sections 3.3, 3.3.1 to 3.3.4, 3.4, 3.4.1, 3.4.2 , Selected scheduling topics from 4.2 and 4.3, 4.6, 4.7 of Text)</b></p>			<b>L1,L2, L3</b>

<b>Module-3</b>	
<p><b>Memory Management:</b> Contiguous Memory allocation, Non-Contiguous Memory Allocation, Paging, Segmentation, Segmentation with paging, Virtual Memory Management, Demand Paging, VM handler, FIFO, LRU page replacement policies, Virtual memory in Unix and Linux  <b>(Topics from Sections 5.5 to 5.9, 6.1 to 6.3 except Optimal policy and 6.3.1, 6.7,6.8 of Text)</b></p>	<b>L1,L2, L3</b>
<b>Module-4</b>	
<p><b>File Systems:</b> File systems and IOCS, File Operations, File Organizations, Directory structures, File Protection, Interface between File system and IOCS, Allocation of disk space, Implementing file access  <b>(Topics from Sections 7.1 to 7.8 of Text).</b></p>	<b>L1,L2</b>
<b>Module5</b>	
<p><b>Message Passing and Deadlocks:</b> Overview of Message Passing, Implementing message passing, Mailboxes, Deadlocks, Deadlocks in resource allocation, Handling deadlocks, Deadlock detection algorithm, Deadlock Prevention  <b>(Topics from Sections 10.1 to 10.3, 11.1 to 11.5 of Text).</b></p>	<b>L1, L2</b>
<p><b>Course outcome (Course Skill Set)</b>  At the end of the course, students will be able to:</p> <ol style="list-style-type: none"> <li>1. Explain the goals, structure, operation and types of operating systems.</li> <li>2. Apply scheduling techniques to find performance factors.</li> <li>3. Explain organization of file systems and IOCS.</li> <li>4. Apply suitable techniques for contiguous and non-contiguous memory allocation.</li> <li>5. Describe message passing, deadlock detection and prevention methods.</li> </ol>	

## Assessment Details (both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). The student is declared as a pass in the course if he/she secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

### Continuous Internal Evaluation:

- There are 25 marks for the CIE's Assignment component and 25 for the Internal Assessment Test component.
- Each test shall be conducted for 25 marks. The first test will be administered after 40-50% of the coverage of the syllabus, and the second test will be administered after 85-90% of the coverage of the syllabus. The average of the two tests shall be scaled down to 25 marks
- Any two assignment methods mentioned in the 22OB2.4, if an assignment is project-based then only one assignment for the courses shall be planned. The schedule for assignments shall be planned properly by the course teacher. The teacher should not conduct two assignments at the end of the semester if two assignments are planned. Each assignment shall be conducted for 25 marks. (If two assignments are conducted then the sum of the two assignments shall be scaled down to 25 marks)  
The final CIE marks of the course out of 50 will be the sum of the scale-down marks of tests and assignment/s marks.

**Internal Assessment Test question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

### Semester-End Examination:

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**).

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.
4. Marks scored shall be proportionally reduced to 50 marks

<b>Data Structures Using C</b>		Semester	IV
Course Code	BEC405D	CIE Marks	50
Teaching Hours/Week (L: T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	03
Examination nature (SEE)	Theory		

### **COURSE OVERVIEW:**

### **COURSE OBJECTIVES:**

The objectives of this course are to:

1. Develop proficiency in designing and implementing fundamental data structures.
2. Learn various sorting and searching algorithms and analyze their time complexity.
3. Understand algorithmic problem-solving techniques, including recursion.
4. Explore advanced data structures like trees, graphs, and hash tables.
5. Apply data structures and algorithms knowledge to solve real-world programming challenges efficiently.

### **Teaching-Learning Process (General Instructions)**

These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.

1. The lecturer's approach (L) does not have to be limited to traditional methods of teaching. It is possible to incorporate alternative and effective teaching methods to achieve the desired outcomes.
2. Utilize videos and animations to illustrate the functioning of different techniques used in the manufacturing of smart materials.
3. Foster collaborative learning exercises within the classroom to encourage group participation and engagement.
4. Pose a minimum of three Higher Order Thinking (HOT) questions during class discussions to stimulate critical thinking among students.
5. Implement Problem-Based Learning (PBL) as an approach that enhances students' analytical skills and nurtures their ability to design, evaluate, generalize, and analyze information, rather than solely relying on rote memorization.

### **Module-1**

Arrays:1D,2D and multidimensional.

Pointers: Definition and Concepts, Array of pointers, Structures and unions. Array of structures, pointer arrays, pointer to structures. Passing pointer variable as parameter in functions

Dynamic memory allocation: malloc(), calloc(), realloc() and free function.

Introduction to data structures and algorithms

Text book 1 -Chapter-1.1-1.3 except Rational Numbers.

Text Book 2, chapter-2

### **Module-2**

The Stack – Definition and examples, primitive operations, Example. Representing Stacks in C, Example: Infix, Postfix and Prefix, converting an Expression from Infix to Prefix and Program.

Text Book -1-Chapter – 2.1-2.3

Recursion – Recursive Definition and Processes, Recursion in C, Writing Recursive Programs.

Recursions - Text Book -1-Chapter – 3.1-3.3

### **Module-3**

Queues and Lists – The Queue and its sequential representation, Linked Lists, Lists in C.

Other Lists structures – Circular Lists, Stacks, Queues as circular list. The Josephus problem, doubly linked lists.

Linked lists and Queues - Text Book -1-Chapter – 4.1-4.3,4.5

### **Module-4**

Trees – Binary Trees, binary tree representations, Huffman algorithm, Trees and their applications.

Searching – Basic searching Techniques, Tree Searching.

Trees - Text Book -1-Chapter – 5.1-5.3,5.5,7.1,7.2

### **Module-5**

Hashing – Introduction, Static Hashing, Dynamic Hashing

Text Book 3 -8.1 – 8.3

Graphs - Graph representation, Elementary graph operations, Minimum cost spanning Trees – Kruskal's Algorithm, Prim's algorithm

Text Book 3 - 6.1,6.2,6.3.1,6.3.2

### **Course Outcomes (COs) (Course Skill Set)**

At the end of the course, the student will be able to:

1. Master the implementation and application of key data structures in programming.
2. Demonstrate the ability to analyze algorithm efficiency and optimize code.
3. Solve complex problems by applying algorithmic strategies and techniques.
4. Design and implement algorithms for tasks involving searching, sorting, and graph traversal.
5. Utilize data structures and algorithms to enhance software performance and scalability

### **Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

### **Continuous Internal Evaluation:**

- For the Assignment component of the CIE, there are 25 marks and for the Internal Assessment Test component, there are 25 marks.
- The first test will be administered after 40-50% of the syllabus has been covered, and the second test will be administered after 85-90% of the syllabus has been covered
- Any two assignment methods mentioned in the 22OB2.4, if an assignment is project-based then only one assignment for the course shall be planned. The teacher should not conduct two assignments at the end of the semester if two assignments are planned.
- For the course, CIE marks will be based on a scaled-down sum of two tests and other methods of assessment.

**Internal Assessment Test question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

### **Semester-End Examination (SEE):**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**).

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.

### **Suggested Learning Resources:**

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

Real world problem solving using group discussion.

- Back/Forward stacks on browsers.
- Undo/Redo stacks in Excel or Word.
- Linked list representation of real-world queues -Music player, image viewer
- Real world problem solving and puzzles using group discussion. E.g., Fake coin identification, Peasant, wolf, goat, cabbage puzzle, Konigsberg bridge puzzle etc.,
  - Demonstration of solution to a problem through programming.

### Assessment Details(both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each course. The student has to secure not less than 35% (18 Marks out of 50) in the semester-end examination (SEE).

#### Continuous Internal Evaluation(CIE):

CIE marks for the practical course is **50 Marks**.

The split-up of CIE marks for record/journal and test are in the ratio **60:40**.

- Each experiment to be evaluated for conduction with observation sheet and record write-up. Rubrics for the evaluation of the journal/write-up for hardware/software experiments designed by the faculty who is handling the laboratory session and is made known to students at the beginning of the practical session.
- Record should contain all the specified experiments in the syllabus and each experiment write-up will be evaluated for 10 marks.
- Total marks scored by the students are scaled down to 30 marks (60% of maximum marks).
- Weightage to be given for neatness and submission of record/write-up on time.
- Department shall conduct 02 tests for 100 marks, the first test shall be conducted after the 8<sup>th</sup> week of the semester and these test shall be conducted after the 14<sup>th</sup> week of the semester.
- In each test, write-up, conduction of experiment, acceptable result, and procedural knowledge will carry a weightage of 60% and the rest 40% for viva-voce.
- The suitable rubrics can be designed to evaluate each student's performance and learning ability. Rubrics suggested in Annexure-II of Regulation book
- The average of 02 tests is scaled down to **20 marks** (40% of the maximum marks).

The Sum of scaled-down marks scored in the report write-up/journal and average marks of two tests is the total CIE marks scored by the student.

#### Semester End Evaluation(SEE):

SEE marks for the practical course is 50 Marks.

SEE shall be conducted jointly by the two examiners of the same institute, examiners are appointed by the University. All laboratory experiments are to be included for practical examination.

(Rubrics) Breakup of marks and the instructions printed on the cover page of the answer script to be strictly adhered to by the examiners. **OR** based on the course requirement evaluation rubrics shall be decided jointly by examiners.

Students can pick one question (experiment) from the question slot prepared by the internal/external examiners jointly.

Evaluation of test write-up/ conduction procedure and result/viva will be conducted jointly by examiners. General rubrics suggested for SEE are mentioned here, write up-20%, Conduction procedure and result -60%, Viva-voce 20% of maximum marks. SEE of practical shall be evaluated for 100 marks and scored marks shall be scaled down to 50 marks (however, based on course type, rubrics shall be decided by the examiners)

Change of experiment is allowed only once and 15% Marks allotted to the procedure part to be made zero. The duration of SEE is 03 hours

Rubrics suggested in Annexure-II of Regulation book

Examination type (SEE)	Practical		
<b>Course objectives:</b> This course will enable students to:			
<ul style="list-style-type: none"> <li>Understand the basic programming of Microcontrollers.</li> <li>Develop the 8051 Microcontroller-based programs for various applications using Assembly Language &amp; C Programming.</li> <li>Program 8051 Microcontroller to control an external hardware using suitable I/O ports.</li> </ul>			
Note	Execute the following experiments by using Keil Microvision Simulator (any 8051 Microcontroller can be chosen as the target) and Hardware Interfacing Programs using 8051 Trainer Kit.		
Sl.No	<b>I. Assembly Language Programming</b>		
<b>Data Transfer Programs:</b>			
1	Write an ALP to move a block of n bytes of data from source (20h) to destination (40h) using Internal-RAM.		
2	Write an ALP to move a block of n bytes of data from source (2000h) to destination (2050h) using External RAM.		
3	Write an ALP To exchange the source block starting with address 20h, (Internal RAM) containing N (05) bytes of data with destination block starting with address 40h (Internal RAM).		
4	Write an ALP to exchange the source block starting with address 10h (Internal memory), containing n (06) bytes of data with destination block starting at location 00h (External memory).		
<b>Arithmetic &amp; Logical Operation Programs:</b>			
5	Write an ALP to add the byte in the RAM at 34h and 35h, store the result in the register R5 (LSB) and R6 (MSB), using Indirect Addressing Mode.		
6	Write an ALP to subtract the bytes in Internal RAM 34h & 35h store the result in register R5 (LSB) & R6 (MSB).		
7	Write an ALP to multiply two 8-bit numbers stored at 30h and 31h and store 16-bit result in 32h and 33h of Internal RAM.		
8	Write an ALP to perform division operation on 8-bit number by 8-bit number.		
9	Write an ALP to separate positive and negative in a given array.		
10	Write an ALP to separate even or odd elements in a given array.		
11	Write an ALP to arrange the numbers in Ascending & Descending order.		
12	Write an ALP to find Largest & Smallest number from a given array starting from 20h & store it in Internal Memory location 40h.		
<b>Counter Operation Programs:</b>			
13	Write an ALP for Decimal UP-Counter.		
14	Write an ALP for Decimal DOWN-Counter.		
15	Write an ALP for Hexadecimal UP-Counter.		
16	Write an ALP for Hexadecimal DOWN-Counter.		
<b>II. C Programming</b>			
1	Write an 8051 C program to find the sum of first 10 Integer Numbers.		
2	Write an 8051 C program to find Factorial of a given number.		
3	Write an 8051 C program to find the Square of a number (1 to 10) using Look-Up Table.		
4	Write an 8051 C program to count the number of Ones and Zeros in two consecutive memory locations.		
<b>III. Hardware Interfacing Programs</b>			
1	Write an 8051 C Program to rotate stepper motor in Clock & Anti-Clockwise direction.		
2	Write an 8051 C program to Generate Sine & Square waveforms using DAC interface.		

data using different instructions.

2. Develop Testing and experimental procedures on 8051 Microcontroller, Analyze their operation under different cases.
3. Develop programs for 8051 Microcontroller to implement real world problems.
4. Develop Microcontroller applications using external hardware interface.

#### **Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

#### **Continuous Internal Evaluation (CIE):**

CIE marks for the practical course are **50 Marks**.

The split-up of CIE marks for record/ journal and test are in the ratio **60:40**.

- Each experiment is to be evaluated for conduction with an observation sheet and record write-up. Rubrics for the evaluation of the journal/write-up for hardware/software experiments are designed by the faculty who is handling the laboratory session and are made known to students at the beginning of the practical session.
- Record should contain all the specified experiments in the syllabus and each experiment write-up will be evaluated for 10 marks.
- Total marks scored by the students are scaled down to **30 marks** (60% of maximum marks).
- Weightage to be given for neatness and submission of record/write-up on time.
- Department shall conduct a test of 100 marks after the completion of all the experiments listed in the syllabus.
- In a test, test write-up, conduction of experiment, acceptable result, and procedural knowledge will carry a weightage of 60% and the rest 40% for viva-voce.
- The suitable rubrics can be designed to evaluate each student's performance and learning ability.
- The marks scored shall be scaled down to **20 marks** (40% of the maximum marks).

The Sum of scaled-down marks scored in the report write-up/journal and marks of a test is the total CIE marks scored by the student.

#### **Semester End Evaluation (SEE):**

- SEE marks for the practical course are 50 Marks.
- **SEE shall be conducted jointly by the two examiners of the same institute, examiners are appointed by the Head of the Institute.**
- The examination schedule and names of examiners are informed to the university before the conduction of the examination. These practical examinations are to be conducted between the schedule mentioned in the academic calendar of the University.
- All laboratory experiments are to be included for practical examination.
- (Rubrics) Breakup of marks and the instructions printed on the cover page of the answer script to be strictly adhered to by the examiners. **OR** based on the course requirement evaluation rubrics shall be decided jointly by examiners.
- Students can pick one question (experiment) from the questions lot prepared by the examiners jointly.
- Evaluation of test write-up/ conduction procedure and result/viva will be conducted jointly by examiners.

General rubrics suggested for SEE are mentioned here, writeup-20%, Conduction procedure and result in - 60%, Viva-voce 20% of maximum marks. SEE for practical shall be evaluated for 100 marks and scored marks shall be scaled down to 50 marks (however, based on course type, rubrics shall be decided by the examiners)

Change of experiment is allowed only once and 15% of Marks allotted to the procedure part are to be made zero. The minimum duration of SEE is 02 hours

<b>Module-1</b>			
<p><b>Introduction:</b> Programmable logic controller (PLC), role in automation (SCADA), advantages and disadvantages, hardware, internal architecture, sourcing and sinking (<b>Textbook 1: 1.1 to 1.4</b>)  <b>I/O devices and Processing:</b> list of input and output devices, examples of applications. I/O processing, input/output units, signal conditioning, remote connections, networks, processing inputs I/O addresses. (<b>TextBook1: 2.1 to 2.3 and 4.1 to 4.7</b>).</p>			
<b>Module-2</b>			
<p><b>Programming:</b> Ladder programming- ladder diagrams, logic functions, latching, multiple outputs, entering programs, functional blocks, program examples like location of stop and emergency switches. (<b>TextBook1: 5.1 to 5.7</b>).</p>			
<b>Module-3</b>			
<p><b>Programming Methods:</b> Instruction Lists- Ladder programs and Instruction lists, Branch codes, Programming Examples- Signal lamp-valve operation task. Sequential Function Charts- Branching and convergence. (<b>TextBook1: 6.1 to 6.3</b>).</p>			
<b>Module-4</b>			
<p><b>Internal Relays:</b> ladder programs, battery-backed relays, one-shot operation, set and reset, master control relay (<b>TextBook1: 7.1 to 7.6</b>).</p> <p><b>Timers and counters:</b> Types of timers, ON and OFF- delay timers, pulse timers, forms of counter, programming, up and down counters. (<b>TextBook1: 9.1 to 9.6</b>).</p>			
<b>Module-5</b>			

**Shift register and data handling:** shift registers, ladder programs, registers and bits, data handling, arithmetic functions. **(TextBook1: 11.1 to 11.2 and 12.1 to 12.3)**

**Course outcome (Course Skill Set)**

At the end of the course, the student will be able to :

1. Describe the PLC and how to construct PLC ladder diagrams.
2. Illustrate an application with programming.
3. Describe characteristics of registers and conversion examples.
4. Apply PLC functions to timing and counting applications.
5. Analyse the analog operation of PLC and demonstrate the robot applications with PLC.

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). The student is declared as a pass in the course if he/she secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

**Continuous Internal Evaluation:**

- There are 25 marks for the CIE's Assignment component and 25 for the Internal Assessment Test component.
- Each test shall be conducted for 25 marks. The first test will be administered after 40-50% of the coverage of the syllabus, and the second test will be administered after 85-90% of the coverage of the syllabus. The average of the two tests shall be scaled down to 25 marks
- Any two assignment methods mentioned in the 22OB2.4, if an assignment is project-based then only one assignment for the course shall be planned.
- The schedule for assignments shall be planned properly by the course teacher. The teacher should not conduct two assignments at the end of the semester if two assignments are planned. Each assignment shall be conducted for 25 marks. (If two assignments are conducted then the sum of the two assignments shall be scaled down to 25 marks)
- The final CIE marks of the course out of 50 will be the sum of the scale-down marks of tests and assignment/s marks.

**Internal Assessment Test question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

**Semester-End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course **(duration 01 hours)**.

1. SEE paper shall be set for 50 questions, each of the 01 marks. The pattern of the question paper is MCQ (multiple choice questions).
2. The time allotted for SEE is 01 hour. The student has to secure a minimum of 35% of the maximum marks meant for SEE.

**Suggested Learning Resources:**

**Textbooks:**

1. Programmable Logic controllers-W Bolton, 5th edition/6th edition, Elsevier- newness, 2009/2015.
2. Programmable logic controllers - principles and applications"-John W. Webb, Ronald A Reiss, Pearson education, 5th edition, 2007.

**Reference Books:**

- 1 Programmable Logic Controllers"- E. A Paar, 3rd Edition, An Engineers Guide. Newness, 2003.
- 2 "Introduction to Programmable Logic Controller"- Garry Dunning, 3rd Edition, Thomson Asia Pte Ltd. Publication, 2006
- 3 "PLCs & SCADA - Theory and Practice"- Rajesh Mehra, Vikrant Vij, 2nd Edition, Laxmi publication, 2017
- 4 "PLC Programming for Industrial Automation"- Kevin Collins, 1st Edition, Kindle, 2016

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning.**

- Quiz and Seminars

<b>Data Structures Lab using C</b>			
Course Code	BECL456 D	CIE Marks	50
Teaching Hours/Week (L:T:P:S)	0:0:2	SEE Marks	50
Total Hours of Pedagogy	15 Sessions	Total	10 0
Credits	01	Exam Hours	03
<b><i>*Additional One hour may be considered for instructions if required</i></b>			
<b>Course objectives:</b>			
<ul style="list-style-type: none"> <li>• Apply theoretical knowledge of data structures and algorithms to practical programming tasks.</li> <li>• Gain hands-on experience in implementing and debugging data structures and algorithms through coding exercises and projects.</li> </ul>			
<b>Sl..N O</b>	<b>Experiments</b>		
1	Write a C Program to create a Student record structure to store, N records, each record having the structure shown below: USN, Student Name and Semester. Write necessary functions a. To display all the records in the file. b. To search for a specific record based on the USN. In case the record is not found, suitable message should be displayed. Both the options in this case must be demonstrated. (Use pointer to structure for dynamic memory allocation)		
2	Write a C Program to construct a stack of integers and to perform the following operations on it: a. Push b. Pop c. Display The program should print appropriate messages for stack overflow, stack underflow, and stack empty.		
3	Write a C Program to convert and print a given valid parenthesized infix arithmetic expression to postfix expression. The expression consists of single character operands and the binary operators + (plus), - (minus), * (multiply) and / (divide).		
4	Write a C Program to simulate the working of a queue of integers using an array. Provide the following operations: a. Insert b. Delete c. Display		
5	Write a C Program using dynamic variables and pointers to construct a stack of integers using singly linked list and to perform the following operations: a. Push b. Pop c. Display The program should print appropriate messages for stack overflow and stack empty.		
6	Write a C Program to support the following operations on a doubly linked list where each node consists of integers: a. Create a doubly linked list by adding each node at the front. b. Insert a new node to the left of the node whose key value is read as an input c. Delete the node of a given data, if it is found, otherwise display appropriate message. d. Display the contents of the list. (Note: Only either (a,b and d) or (a, c and d) may be asked in the examination)		
7	Write a C Program a. To construct a binary search tree of integers. b. To traverse the tree using all the methods i.e., inorder, preorder and postorder. c. To display the elements in the tree.		
8	Write recursive C Programs for a. Searching an element on a given list of integers using the Binary Search method. b. Solving the Towers of Hanoi problem.		
9	Write a program to traverse a graph using BFS method. Write a program to check whether given graph is connected or not using DFS method.		
10	Design and develop a program in C that uses Hash Function $H:K \rightarrow L$ as $H(K)=K \text{ mod } m$ (remainder method) and implement hashing technique to map a given key K to the address space L. Resolve the collision (if any) using linear probing		
Note: The students must be encouraged to create Leetcode account and work on Leetcode platform to improve the competency.			

**Course outcomes (Course Skill Set):**

At the end of the course the student will be able to:

- Develop proficiency in coding and debugging complex algorithms and data structures.
- Acquire practical problem-solving skills by applying data structures and algorithms to real-world programming challenges.
- Develop a C program to perform arithmetic operation using data structure and operators.
- Understand the concept of graph theory and develop a C program for searching an element.
- Develop a C program to check the given graph is connected using different algorithms.

### Assessment Details(both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each course. The student has to secure not less than 35% (18 Marks out of 50) in the semester-end examination (SEE).

#### Continuous Internal Evaluation(CIE):

CIE marks for the practical course is **50 Marks**.

The split-up of CIE marks for record/journal and test are in the ratio **60:40**.

- Each experiment to be evaluated for conduction with observation sheet and record write-up. Rubrics for the evaluation of the journal/write-up for hardware/software experiments designed by the faculty who is handling the laboratory session and is made known to students at the beginning of the practical session.
- Record should contain all the specified experiments in the syllabus and each experiment write-up will be evaluated for 10 marks.
- Total marks scored by the students are scaled down to 30 marks (60% of maximum marks).
- Weightage to be given for neatness and submission of record/write-up on time.
- Department shall conduct 02 tests for 100 marks, the first test shall be conducted after the 8<sup>th</sup> week of the semester and these test shall be conducted after the 14<sup>th</sup> week of the semester.
- In each test, write-up, conduction of experiment, acceptable result, and procedural knowledge will carry a weightage of 60% and the rest 40% for viva-voce.
- The suitable rubrics can be designed to evaluate each student's performance and learning ability. Rubrics suggested in Annexure-II of Regulation book
- The average of 02 tests is scaled down to **20 marks** (40% of the maximum marks).

The Sum of scaled-down marks scored in the report write-up/journal and average marks of two tests is the total CIE marks scored by the student.

#### Semester End Evaluation(SEE):

SEE marks for the practical course is 50 Marks.

SEE shall be conducted jointly by the two examiners of the same institute, examiners are appointed by the University All laboratory experiments are to be included for practical examination.

(Rubrics) Breakup of marks and the instructions printed on the cover page of the answer script to be strictly adhered to by the examiners. **OR** based on the course requirement evaluation rubrics shall be decided jointly by examiners.

Students can pick one question (experiment) from the question slot prepared by the internal/external examiners jointly.

Evaluation of test write-up/ conduction procedure and result/viva will be conducted jointly by examiners. General rubrics suggested for SEE are mentioned here, write up-20%, Conduction procedure and result -60%, Viva-voce 20% of maximum marks. SEE of practical shall be evaluated for 100 marks and scored marks shall be scaled down to 50 marks (however, based on course type, rubrics shall be decided by the examiners)

Change of experiment is allowed only once and 15% Marks allotted to the procedure part to be made zero. The duration of SEE is 03 hours

Rubrics suggested in Annexure-II of Regulation book

#### Suggested Learning Resources:

Textbooks:

- Data Structures using C, Reema Thareja, 2nd Edition, Oxford University Press, 2011
- Introduction to the Design and Analysis of Algorithms, Anany Levitin: 2nd Edition, 2009. Pearson.
- Online Courses:
  - Coursera: "Algorithms" by Princeton University (taught by Robert Sedgewick and Kevin Wayne).
  - edX: "Algorithmic Design and Techniques" (offered by UC San Diego and Higher School of Economics).
- Websites and Online Resources:
  - Geeks for Geeks: Offers a wide range of tutorials, practice problems, and coding challenges related to data structures and algorithms.
  - Leet Code: Provides coding challenges that are frequently asked in technical interviews and cover a

variety of algorithmic concepts.

- Hacker Rank: Offers coding challenges and competitions with a focus on algorithms and data structures.
- Top Coder: Provides algorithmic challenges and competitions for practicing and improving problem-solving skills.
- YouTube Channels:
  - My code school: Offers video tutorials on various data structures and algorithms topics.
  - The Coding Train: Provides interactive coding tutorials on algorithms and data structures.
- Coding Platforms:
  - Code forces: Offers competitive programming challenges to improve algorithmic problem-solving skills.
  - Hackerearth: Provides coding competitions and challenges along with tutorials and practice problems.

Octave Programming			
Course Code	BECL456C	CIE Marks	50
Teaching Hours/Week (L:T:P:S)	0:0:2	SEE Marks	50
Total Hours of Pedagogy	12 Sessions	Total	100
Credits	01	Exam Hours	02

*\*Additional One hour may be considered for instructions if required*

Course objectives:

- Apply theoretical knowledge of Octave programming to practical programming tasks.
- Gain hands-on experience in implementing and debugging octave Programming through coding exercises and projects.

### Course Syllabus :

Basic data structures in Octave – Vectors, Matrices, Cell Arrays. Special vecors. Linear sampling and logarithmic sampling. Accessing elements of vectors, matrices, and matrices. Mathematical operations on vectors and matrices. Addition, Multiplication, Subtraction, Division, Power, Square-Root, trigonometric operations. Dot Products and Cross Products of Vectors. Matrix multiplication, matrix inverse and matrix transpose operations. Finding eigen values and vectors of a square matrix. Finding the solution of a system of linear equations. Linear programming and integer linear programming using glpk. Plotting in Octave. Subplots, Stem Plots, Semilog and Log-log plots. Packages in Matlab – symbolic, signal processing, control. Applications of Octave to solve problems in Electrical engineering, Electronics engineering, Control Systems, Signals and Systems/Signal Processing.

Sl.NO	Experiments
-------	-------------

1

(a) Define the following matrices using Octave

- A 4x4 identity matrix
- A 4x4 matrix of zeros
- A 4x4 matrix of ones
- The matrix U4 defined below.

$$\begin{array}{cccc}
 1 & 2 & 3 & 4 \\
 2 & 3 & 1 & 4 \\
 1 & 3 & 2 & 4 \\
 4 & 3 & 1 & 2
 \end{array}$$

- Matrix D4 defined below. It is also called the Hadamard matrix of dimension 4.

$$\begin{array}{cccc}
 1 & 1 & 1 & 1 \\
 1 & -1 & 1 & -1 \\
 1 & 1 & -1 & -1 \\
 1 & -1 & -1 & 1
 \end{array}$$

- Matrix H4 defined below

$$\mathbf{H}_4 = \frac{1}{\sqrt{4}} \begin{bmatrix} 1 & 1 & 1 & 1 \\ 1 & 1 & -1 & -1 \\ \sqrt{2} & -\sqrt{2} & 0 & 0 \\ 0 & 0 & \sqrt{2} & -\sqrt{2} \end{bmatrix}$$

- A 4x4 magic square G4
- A 4x4 matrix of random numbers selected from the range  $\{-1,0,1\}$ .
- A 4x4 matrix of random numbers in the range 0 to 1.

(b)

- How can you generate a 4x4 matrix of all 2's?
- Find the transpose of U4.

	<p>related to the identity matrix?</p> <p>(iv) Find the inverse of <math>H_4</math> and verify that it is the inverse.</p> <p>(v) What is the determinant of <math>D_4</math>?</p> <p>(vi) Extract the diagonal elements of <math>H_4</math>.</p> <p>(vii) How can you reshape the elements of <math>D_4</math> into a <math>2 \times 8</math> matrix?</p> <p>(viii) What is the magic sum of a <math>4 \times 4</math> matrix? How can you verify that <math>G_4</math> is indeed a magic square?</p> <p>(ix) The matrix <math>D_4</math> mentioned above is a <math>4 \times 4</math> matrix. We wish to extract the sub-matrix consisting of rows 1 and 4 and columns 1 and 4. [In other words, the four corners of <math>D_4</math>.] Show Octave code for generating the submatrix <math>SM</math>.</p> <p>(x) Check if the <math>H_4</math> and <math>D_4</math> are orthogonal matrices.</p>
2	<p>You will have learnt Kirchhoff's current and voltage laws to solve the voltages and currents in a DC circuit. Given a circuit with <math>n</math> loops, we can write down <math>n</math> equations in <math>n</math> unknowns (loop currents). Alternately, given a circuit with <math>n</math> nodes, we can write down <math>n</math> equations in <math>n</math> unknowns (node voltages). These linear equations can be solved using Octave.</p> <p>(a) Write down the KCL and KVL for the following circuit and solve the node voltages and currents. Assume that <math>V_s</math> is 100V.</p> <div data-bbox="981 1108 1316 1332" data-label="Diagram"> </div> <p>(b) Find the total power dissipated in the circuit.</p> <p>(c) Find the total power supplied by the voltage source.</p> <p>(d) Challenge – Instead of hardcoding the values of the resistors and the voltage source, can you allow the user to input <math>R_1</math>, <math>R_2</math>, <math>R_3</math>, <math>R_4</math>, <math>R_5</math>, and <math>V_s</math>? Develop a complete Octave script which reads in the values of circuit parameters and prints the node voltages, node currents, and power dissipation.</p> <p>(e) Variations of the above exercises can be given to the students. For example, a resistor can be included in series with <math>V_s</math>. Alternately, a different circuit from a text book can be given. You can also change the problem by specifying the current through one of the resistors and asking the user to solve for <math>V_s</math>.</p>
3	<p>(a) Consider the RC circuit shown in the figure below. Plot the voltage across <math>C</math> and the charging current through <math>C</math> when the switch is turned on.</p> <p>(b) What is the rise time of the capacitor voltage?</p>

4

- The figure shows a diode-based rectifier. The diode conducts only when the input voltage is positive. Assume that it is an ideal diode. Plot the half-wave rectified waveform if the input to the rectifier is a 50-Hz sine wave of 200V RMS. Plot the output waveform for four cycles of the input.
- Find the average of the Halfwave-rectified output in Octave and verify your answer using the formula for the average output.
- Plot the output of a full-wave rectifier.
- Find the RMS value of the Fullwave-rectified output in Octave and verify your answer using the formula for the RMS value.
- Assume that the input voltage is  $2\sin(500t)$  V and that the diode has a cut-in voltage of 0.6V. Plot the half-wave and full-wave rectified waveforms and find their average and RMS values.

5

You have studied that any periodic signal of frequency  $f$  can be decomposed into a sum of sine and cosine waveforms whose frequencies are integral multiples of  $f$ . The resulting series is called the Fourier series. Consider the following equation.

$$x(t) = \frac{4}{\pi} \times \sum_{k=1}^{\infty} \left[ \sin(2\pi f(2k-1)t) \right]$$

- Write an Octave program to read  $f$  and  $n$  and plot  $x(t)$ . What does  $x(t)$  resemble?
- How can you modify  $x(t)$  to generate a square waveform of frequency  $f$ , but whose amplitude goes from 0 to 2?
- Generate  $x(t)$  assuming that the square wave goes from -1 to 1 and has a frequency of 1 kHz. Take 100 samples in each period. Perform an FFT analysis of  $x(t)$ .

6

- Given Z parameters, obtain the Y parameters using a function called Z2Y(). Given Y parameters, obtain the Z parameters using a function called Y2Z().
- Find the Z and Y parameters for the T-network

(c) Find the Z and Y parameters for the Delta. Assume that all resistors are 15 Ohms.

(d) Find the T-equivalent of the Delta network above.

(e) Find the T-equivalent of the Delta network above. Let the T network have the resistors  $Z_b, Z_c, Z_a$ .

7

- (a) Represent the number 65 as an unsigned integer using fewest number of bits
- (b) Represent the number -65 as a signed magnitude integer using the fewest number of bits
- (c) Represent the number -65 as a one's complement number using fewest number of bits
- (d) Represent the number -65 as a two's complement number using the fewest number of bits
- (e) Represent the number 1965 in hexadecimal
- (f) Find the decimal equivalent of the hexadecimal number ABCDh
- (g) Assume that "10010101" is a binary number. Interpret it as an unsigned number and convert it to decimal.
- (h) Memory is organized in terms of bytes. When a 32-bit number is read from a memory, 4 bytes have to be read. Suppose the bytes are stored as follows at location A in the memory. In the little-endian representation, the bytes will be organized into a 32-bit register as shown. Write a function which converts a 32-bit number from big-endian to little-endian format.

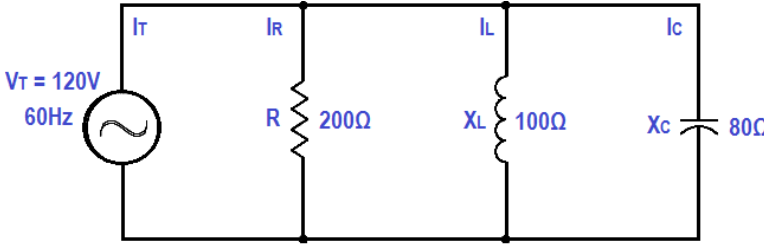

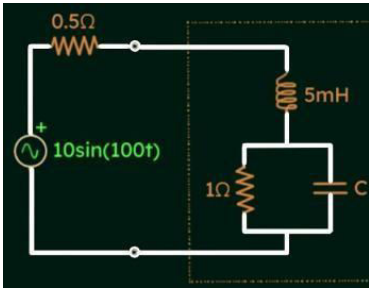

MEM LOC M	00h	03	02	01	00
MEM LOC M+1	01h	Little Endian			
MEM LOC M+2	02h				
MEM LOC M+3	03h				
MEM LOC M+4	04h	00	01	02	03
...	...	Big Endian			

8

A series circuit consists of resistance R, inductance L and capacitance C. A sinusoidal voltage of  $V \sin(\omega t)$  is applied to the series circuit. Assume  $V=100$ . Plot the current in the circuit and the input voltage for the following cases.

- (a)  $\omega=1000, R = 5 \text{ ohm}, L = 1\text{mH}, C = 200\mu\text{F}$ ; is the current leading or lagging? What is the powerdissipation in the circuit?
- (b)  $\omega=10000, R=5 \text{ ohm}, L = 1\text{mH}, C = 200 \mu\text{F}$ ; is the current leading or lagging? What is the powerdissipation in the circuit?
- (c) The resonant frequency  $\omega_0, R = 5 \text{ ohm}, L = 1\text{mH}, C = 200\mu\text{F}$ . What is the phase difference between the voltage and current? What is the value of  $\omega$ ? What is the power

	Write a function to plot the voltage and current. Take the inputs R, L, and C from the user.
9	<p>(a) Consider the circuit shown below and determine the inductance L and capacitance C.          (b) Plot the impedance of the RLC circuit shown in the figure as the frequency is varied from 0 to 10kHz.          (c) Find the resonant frequency from the plot</p> <div style="text-align: center;">  <p>(a) Parallel RLC Circuit</p> </div>
